The Stylistics Of Poetry Context Cognition Discourse History Advances In Stylistics:

The Stylistics of Poetry Peter Verdonk, 2013-08-15 Written over the last thirty years this collection of Professor Peter Verdonk's most important work on the stylistics of poetry clearly shows that the stylistics of poetic discourse is a diverse and valuable interdisciplinary. Discussing the poetry of Auden, Heaney and Larkin amongst many others, Verdonk covers everything from intrinsic textual meaning and external context in its widest sense to the reader's cognitive and emotive response to poems. The book will appeal to all students on stylistics and literary linguistics courses especially those focussing on poetry and poetic language.

Cognitive Approaches to Old English Poetry Antonina Harbus, 2012 Offers an entirely new way of interpreting and examining Anglo-Saxon texts via theories derived from cognitive studies. A major thoughtful study applying new and serious interpretative and critical perspectives to a central range of Old English poetry. Professor John Hines, Cardiff University. Cognitive approaches to literature offer new and exciting ways of interpreting literature and mentalities by bringing ideas and methodologies from Cognitive Science into the analysis of literature and culture. While these approaches are of particular value in relation to understanding the texts of remote societies, they have to date made very little impact on Anglo-Saxon Studies. This book therefore acts as a pioneer, mapping out the new field, explaining its relevance to Old English Literary Studies and demonstrating in practice its application to a range of key vernacular poetic texts including *Beowulf*, *The Wanderer* and poems from the Exeter Book. Adapting key ideas from three related fields: Cognitive Literary Cultural Studies, Cognitive Poetics and Conceptual Metaphor Theory in conjunction

with more familiar models derived from Literary Analysis Stylistics and Historical Linguistics allows several new ways of thinking about Old English literature to emerge It permits a systematic means of examining and accounting for the conceptual structures that underpin Anglo Saxon poetics as well as fuller explorations at the level of mental processing of the workings of literary language in context The result is a set of approaches to interpreting Anglo Saxon textuality through detailed studies of the concepts mental schemas and associative logic implied in and triggered by the evocative language and meaning structures of surviving works ANTONINA HARBUS is Professor in the Department of English at Macquarie University Sydney Australia
