region of the mind there are certain activities which seem to be outside of the category of those which belong strictly to the subconscious activities which cannot be considered as resulting from the past race or individual experience along the lines of racial memory or heredity or of the memory of the individual and yet which do not fit into the category of the parallel activities which we have classified as the psychic In short these activities seem rather to belong to a higher rather than a lower or even parallel plane of consciousness The Orientals for centuries have recognized these activities and have classified them as belonging to the superconscious plane of mentation a plane above the ordinary plane of consciousness just as the subconscious is a plane below it and the psychic plane parallel to it The superconscious plane is a plane of above consciousness just as the subconscious is a plane below consciousness How to develop and unfold the superconscious that is what Atkinson will try to teach to the minds that are prepared
