Congress. Senate. Committee on the Judiciary, 1971 **Chinese Visions of World Order** Ban Wang, 2017-10-19 The Confucian doctrine of tianxia all under heaven outlines a unitary worldview that cherishes global justice and transcends social geographic and political divides For contemporary scholars it has held myriad meanings from the articulation of a cultural imaginary and political strategy to a moralistic commitment and a cosmological vision The contributors to Chinese Visions of World Order examine the evolution of tianxia s meaning and practice in the Han dynasty

The Paradoxes of Nationalism Chimene I. Keitner, 2012-02-01 The Paradoxes of Nationalism explores a critical stage in the development of the principle of national self determination the years of the French Revolution during which the idea of the nation was fused with that of self government While scholars and historians routinely cite the French Revolution as the origin of nationalism they often fail to examine the implications of this connection Chim ne I Keitner corrects this omission by drawing on history and political theory to deepen our understanding of the historical and normative underpinnings of national self determination as a basis for international political order Based on this analysis Keitner constructs a framework for evaluating nation based claims in contemporary world politics and identifies persistent theoretical and practical tensions that must be taken into account in contemplating proposals for civic nationalism and alternative nonnational models
