Theory And Practice Of Brief Therapy:

Theory and Practice of Brief Therapy Simon H. Budman, Alan S. Gurman, 2016-03-14 This classic work provides a richly textured overview of the whys and hows of brief therapy. The authors identify the central features of effective time limited interventions for individuals, couples, families, and groups. Taking a developmental approach to treatment, they explain how brief therapy can help at different times in a patient's life as changes and transitions bring on new stresses and challenges. A practical framework is provided for selecting and screening patients, rapidly finding a focus for clinical work, and making optimal use of available time. Case examples and extensive transcripts are included to illustrate the use of strategies and techniques drawn from many different psychotherapy perspectives. Throughout, the focus is on creative and efficient ways to help patients build on existing strengths and make desired changes in their interactions with others. **Theory and**

Budman, Michael F. Hoyt, Steven Friedman, 1992-08-07 In all models of therapy, the initial interview is a significant component. It sets the tone, structure, direction, and foundation of treatment. In brief therapy, the opening moves are even more important because there is less time later to correct errors or change direction. This volume provides practitioners with an up close view of exactly what expert brief therapists do at the beginning of treatment and why they do it. Each author describes his or her particular orientation, presents annotated transcripts of actual initial sessions, and responds to pointed questions from the editors about their cases. Following an introduction by the editors, the first section of the book covers initial sessions in therapies for individuals. These include the rational emotive approach, a one session intervention, an interpersonal psychodynamic model, neurolinguistic programming, and the I D E interpersonal developmental existential approach. Beginning cognitive behavioral therapy with depressed or drug abusing adolescents is covered, and a directive approach strongly influenced by the work of Milton Erickson is presented. The next section addresses methods and strategies for working with couples and families. Chapters on marital therapy cover an integrative approach that combines an intra and interpersonal focus in marital therapy, a cognitive behavioral approach that is based on principles of social learning and social exchange theory, emotionally focused therapy, and an approach that utilizes
