Leaders of the Light in the Age of Great Awakening Don P. Valeri,2025-09-15 Many seers mystics astrologers philosophers even theologians have foreseen a new age that is birthing on planet Earth Some call it the Age of Great Awakening which is the term used in this book It will be an age in which spirituality will prevail and not religion politics finance and material gain that now predominate human thinking It will encompass and affect every facet of our lives especially those who currently rule over humanity Why do we have so many Evil corrupt psychopath people ruling over us In this age a new breed or species of Leaders will emerge This book is about those emerging leaders what they will look like how they will behave ethically and what they will have to face and confront in the decades to come A good portion of the book deals with our flawed understanding of leadership and what can be called leadership from the shadows Here the words of Carl Jung are worth remembering In order to know the light we must first experience the darkness And it is this darkness that so many are now living through But as this wise person also said As far as we can discern the sole purpose of human existence is to kindle a light in the darkness of mere being "A Curious Machine" Arseny Ermakov,Glen

O'Brien,2023-09-28 In his sermon What Is Man John Wesley spoke of the human being as a curious machine reflecting the eighteenth century view of the person as a set of complex mechanisms animated by the soul The rapid rate of technological development in recent decades is opening toward a future in which the centrality and uniqueness of human beings is undergoing a shift Developments in robotics artificial intelligence surveillance autonomous weapons human enhancement and genetic modification raise an array of questions for the Christian tradition The awareness of the negative impact of human activity on the natural environment is challenging the traditional view of humanity as having a uniquely privileged role at the heart of creation This collection of essays addresses Wesleyan and broadly Christian voices that explore the theological philosophical biblical ethical and practical implications of emerging technologies their impact upon different aspects of human life and the possibilities that are opening up toward a posthuman future *Reaching for Immortality: Can Science Cheat Death?* Sandra J. Godde,2022-04-01 At the forefront of science and technology there lie competing ideologies

as to the nature of humanity and the future of human flourishing Will technology become the ultimate savior or has the work of salvation already been accomplished Are we only creatures of mind and body or are we spiritual beings at our core Reaching for Immortality bravely examines the agenda and ideals of the transhumanist movement and compares and contrasts these with the biblical vision of a physical resurrection and a divine upgrade of the entire created order Which vision of the future will inspire you and capture your allegiance This book is a primer to provoke deep thought about the impact of technological change on human personhood and asks crucial questions facing our age What does it mean to be human in light of exponential technological growth What is transhumanism and where is it leading us How important is embodiment for our personal identity How would the biblical understanding of personhood survive in a posthuman future

The Debilitating Duo Roche Coleman, 2023-10-02 Is it possible to violate God's moral law without experiencing guilt and shame Can a person silence their conscience from the strange emotions that emerge when one sins An examination of the original design of humanity in the imago Dei suggests one cannot sin and avoid the debilitating duo Humanity is created to live within the moral structure established by God Therefore a violation of the divine laws which is sin leads to guilt and shame The strange emotions were innate sensation imparted to humanity to stop rebellion against the moral laws and to compel an offender to acknowledge the offense through the confession of sin Unconfessed sin debilitates the physical and mental functions of a person created in the image of God Guilt and shame are the strange emotions that serve as mental guardians for an individual as well as for the society in general The duo was given as silent deterrents to immoral behaviors
