Flaherty, Thomas G. Matyók, Sean Byrne, Hamdesa Tusó, 2015-10-16 The twenty first century has brought with it a shift from the notion of human security being located in secure national borders to the need to secure the safety freedom and dignity of all Despite efforts to equalize women's status in the world evidenced by changes in many international projects requiring a gender focus women and men experience most of the world in very different ways according to gender Further the reality is that humans who do not all fall neatly into one of these categories male or female often find their lives further challenged In the 1980s Peace and Conflict Studies first began to acknowledge and study the different experiences males and females have during war and peace Since then there have been books about women and war women working at grassroots levels to build peace women and transitional justice women and peace education and women's views of human security All of these works have contributed to the discourse of our changing world This book brings together some of those themes and voices and adds more with the final product being more than the sum of its parts We add to the conversation a book that considers foundational fundamental issues that span from the interpersonal to the global Many of the chapters describe empirical research completed with author and community shared here for the first time Part One is a collection of case studies documenting challenges and responses to peacebuilding by women from various parts of the world Part Two focuses on

**Suicide through a Peacebuilding Lens** Katerina Standish, 2019-07-24 This book as the first exploration of suicide in Peace and Conflict Studies PACS illustrates the scarcity of suicide research in the discipline and argues that the leading cause of violent death worldwide is a multifaceted phenomenon that needs to be fully comprehended as a significant and often preventable form of world wide violence The author supplies a theoretical framework for assessing suicide as medical or instrumental posits interdisciplinary complementarity and offers future lines of inquiry that challenge established notions of prevention The book presents a PACS meta theory termed encounter theory and supplies a suicidal peacebuilding platform via relationship This book questions why more PACS scholars aren't turning their attention to suicide when more people die by suicide than ethnic religious or terroristic violence combined
