Transformative Scenario Planning Working Together To Change The Future:

Transformative Scenario Planning Adam Kahane, 2012-10-15 This is the first book focused on how to do and use scenario planning which is one of the most widely used tools in the world for strategic planning change management innovation problem solving and similar purposes for social change at the community national and global levels Adam Kahane is one of the world's pioneers and leaders on this topic and he is the author of two bestselling books

Transformative Scenario Planning Adam Kahane, 2012-10-15 Transformative scenario planning is a way that people can work together with others to transform themselves and their relationships with one another and their systems In this simple and practical book Kahane explains this methodology and how to use it

[Scenario Planning for Climate Change](#) Nardia Haigh, 2019-06-25 Winner of the 2020 Book Award for the Organizations and the Natural Environment ONE Division of the Academy of Management Climate change and the resultant impact on resource management and societal wellbeing is one of the greatest challenges facing businesses and their long term performance Uncertainty about access to resources unanticipated weather events rapidly changing market conditions and potential social unrest is felt across all business and industry sectors This book sets out an engaging step by step scenario planning method that executives Board members managers and consultants can follow to develop a long term strategy for climate change tailored for their business Most climate change strategy books discuss climate mitigation only focusing on how companies engage with carbon policy new technologies markets and other stakeholders about reducing carbon emissions This book explores these themes but also looks at strategizing for climate change adaptation Adaptation is equally important especially given that companies cannot negotiate with nature There is a need to interpret climate science for business in a way that acknowledges the realities of climate change and identifies a way forwards in responding to this uncertain future

Collaborating with the Enemy Adam Kahane, 2017-07-05 Offers practical guidance for how to work with diverse others which is a precondition for confronting many of the complex challenges we face Morris Rosenberg President Pierre Elliott Trudeau Foundation Collaboration is increasingly difficult and increasingly necessary Often to get something done that really matters to us we need to work with people we don't agree with or like or trust Adam Kahane has faced this challenge many times working on big issues like democracy and jobs and climate change and on everyday issues in organizations and families He has learned that our conventional understanding of collaboration that it requires a harmonious team that agrees on where it's going how it's going to get there and who needs to do what is wrong Instead we need a new approach to collaboration that embraces discord experimentation and genuine cocreation which is exactly what Kahane provides in this groundbreaking and timely book Kahane shows that people who don't see eye to eye really can come together to solve big challenges Whether in our businesses our governments our communities or our personal lives we can all benefit from this smart and timely book Mark Tercek former President The Nature Conservancy and coauthor of *Nature's Fortune* Shows us how thinking and seeing differently can help us navigate

this challenging landscape Kahane abandons orthodoxy in taking on the most intransigent problems showing us the path to effective action in a complex world James Gimian coauthor of The Rules of Victory Collaborating with the Enemy belongs on the same shelf as Sun Tzu s The Art of War and Machiavelli s The Prince Stephen Huddart President The J W McConnell Family Foundation

The Collaboratory Katrin Muff,2017-09-08 The introduction is free to download here This book is about empowering ordinary people to make a difference in the world It explores the transformation that emerges when groups spread around the world working on similar issues discover synchronicities often cross pollinating and collaborate rather than compete A Collaboratory is a facilitated space where stakeholders meet to discuss burning societal issues Each collaboratory is different and needs to be carefully designed to fit the context ambition purpose stakeholders culture and space Part 1 of the book sets the stage by explaining what a collaboratory is where it emerges from how it is defined and how it fits into the larger context of the social lab revolution that is happening all over the world Part 2 of the book unpacks the many dimensions and considerations that contribute to the magic of a collaboratory experience We offer nine unique insights and perspectives that need to be considered and form an integral part of a successful collaboratory Part 3 offers eight inspiring examples of how a collaboratory could be applied We look at applications in the educational field within organizations among institutions and as movements Part 4 offers a pragmatic outlook on how to get started if you want to use the Collaboratory in your own field of work The book offers a narrative roadmap using a real life example of a co designed and co created Collaboratory in Norway Offering practical recommendations and benefits and bringing together insights from a range of experienced academics practitioners and facilitators The Collaboratory is a handbook for experienced or aspiring practitioners in all fields of change in society in organizations of all kind and in the field of education

Values in Sustainable Development Jack Appleton,2013-08-22 To enhance sustainable development research and practice the values of the researchers project managers and participants must first be made explicit Values in Sustainable Development introduces and compares worldviews and values from multiple countries and perspectives providing a survey of empirical methods available to study environmental values as affected by sustainable development The first part is methodological looking at what values are why they are important and how to include values in sustainable development The second part looks at how values differ across social contexts religions and viewpoints demonstrating how various individuals may value nature from a variety of cultural social and religious points of view The third and final part presents case studies ordered by scale from the individual and community levels through to the national regional and international levels These examples show how values can motivate be incorporated into and be an integral part of the success of a project This thought provoking book gives researchers students and practitioners in sustainable development a wealth of approaches to include values in their research

Real Time Strategy Andreas Schühly, Frank Becker, Florian Klein, 2020-04-29 Combining classical scenario thinking the gentle art of perception with the analytical power of big data and artificial intelligence Real Time Strategy presents the decision making of the future which enables decision makers to develop dynamic strategies monitor their validity and react faster

Informal Public Transport in Practice Meleckidzedek Khayesi, Fredrick Muyia Nafukho, 2016-03-03 Transport discourse often concentrates on what is missing from transport policy and practice in developing countries vis vis high income countries rather than articulating local creativity in responding to transport needs as revealed in informal public transport modes such as matatu motorcycle bicycle and animal transport This book helps to correct some of the tendency of inadequate contextualization of knowledge technology and practice learning and transfer from one setting to another in transport and other development programmes While countries such as Kenya have ambitions to develop their transport systems to fit into the globalized transport system they also need to plan transport for ordinary life in both urban and rural areas The matatu service provided by privately owned transport carriers can be seen as a mirror of the life of Kenya revealing how indigenous African entrepreneurship and capitalism straddles various economic political and social systems This book offers a phenomenological and situated analysis of the matatu entrepreneurship in the political economy of Kenya and its embeddedness in society By adopting a social science approach this book highlights a number of political social and practical issues to demonstrate the matatu is not a decontextualized disembodied and lifeless piece of moving metal carrying people and goods but rather part of a self organizing industry with its own logic of practice This book is dedicated to Ajanga Khayesi

Assessing the Societal Implications of Emerging Technologies Evan S. Michelson, 2016-05-12 A growing problem of interest in the field of science and technology policy is that the next generation of innovations is arriving at an accelerating rate and the governance system is struggling to catch up Current approaches and institutions for effective technology assessment are ill suited and poorly designed to proactively address the multidimensional interconnected societal impacts of science and technology advancements that are already taking place and expected to continue over the course of the 21st century This book offers tangible insights into the strategies deployed by well known high profile organizations involved in anticipating the various societal and policy implications of nanotechnology and synthetic biology It focuses predominantly on an examination of the practices adopted by the often cited and uniquely

positioned Project on Emerging Nanotechnologies in the United States as well as being informed by comparisons with a range of institutions also interested in embedding forward looking perspectives in their respective area of innovation The book lays out one of the first actionable roadmaps that other interested stakeholders can follow when working toward institutionalizing anticipatory governance practices throughout the policymaking process
