Translational Approach To Heart Failure:

Translational Approach to Heart Failure Jozef Bartunek, Marc Vanderheyden, 2013-07-13 The refined pathophysiological understanding of the heart failure syndrome together with the surge of new technological advances led to innovative medical and interventional treatment strategies improving the outcome of heart failure patients. However, the complex interplay between the clinical presentation and the array of the interventions requires a coordinated multidisciplinary heart team approach involving various specialists in the cardiovascular field including clinicians, interventionalists, surgeons, and cardiac intensivists. In this book, opinion leaders will review the state of the art management of heart failure with particular emphasis on burning clinical questions and challenges faced by the heart team. New medical and interventional therapies for chronic and acute heart failure are addressed by bridging bench to bedside translation in science and technology into practical clinical application and guidance.
