Transmitting Rights International Organizations Diffusion:

Transmitting Rights Brian Greenhill, 2015-11-03 Transmitting Rights argues that membership in Intergovernmental Organizations IGOs facilitates the diffusion of human rights standards among their member states and that this occurs even within IGOs that have no obvious connection to human rights issues These findings challenge us to think differently about the consequences of IGO membership

Transmitting Rights Brian Greenhill, 2015 Transmitting Rights argues that membership in Intergovernmental Organizations IGOs facilitates the diffusion of human rights standards among their member states and that this occurs even within IGOs that have no obvious connection to human rights issues These findings challenge us to think differently about the consequences of IGO membership

Transmitting Rights Brian Greenhill, 2015 When considering the structures that drive the global diffusion of human rights norms Brian Greenhill argues that we need to look beyond institutions that are explicitly committed to human rights and instead focus on the dense web of international government organizations IGOs some big some small some focused on human rights some not that has arisen in the last two generations While most of these organizations have no direct connection to human rights issues their participation in broader IGO networks has important implications for the human rights practices of their member states Featuring a rigorous empirical analysis Transmitting Rights shows that countries tend to adopt similar human rights practices to those of their IGO partners whether for better or worse Greenhill argues that IGOs constitute a tightly woven fabric of ties between states and that this network provides an important channel through which states can influence the behavior of others Indeed his analysis suggests that a policy of isolating rogue states is probably self defeating given that this will reduce their exposure to some of the more positive IGO based influences on their human rights Greenhill's analysis of the role of IGOs in rights diffusion will not only increase our understanding of the international politics of human rights it will also reshape how we think about the role of international institutions in world politics

Ideology and International Institutions Erik Voeten,2021-01-12 Can international institutions help create more cooperative and peaceful relations between states If so how And what motivates states to create meaningful institutions in the first place Though theorists and researchers have approached these questions from different schools of thought the commonality among them is that institutions are apolitical and their purpose is to assure common gains or develop shared social norms and identities Institutions succeed if they rise above petty power politics and fail when they succumb to political confrontations In this book Erik Voeten offers a new broader understanding of international institutions Current theories offer conflicting portraits of why IOs form why they succeed or not and their role in current politics While international institutions can enhance the welfare of participants they are simultaneously the structural means through which actors try to get what they want often at the expense of others Voeten argues that these distributive politics shape institutions and in turn institutions shape the conduct of such politics The book will largely be theoretical as its purpose is to illustrate an alternative way of understanding institutions rather than to test a specific hypothesis After developing what the distributive theory of international institutions is Voeten examines how this theory bears on other understandings of international institutions on a variety of scholarly perspectives drawing on the extensive work in this area
