Virtual Reality Representations In Contemporary Media:

Virtual Reality Melanie Chan, 2014-01-16 The idea of virtual realities has a long and complex historical trajectory spanning from Plato's concept of the cave and the simulacrum to artistic styles such as Trompe L'oeil and more recently developments in 3D film television and gaming However this book will pay particular attention to the time between the 1980s to the 1990s when virtual reality and cyberspace were represented particularly in fiction as a wondrous technology that enabled transcendence from the limitations of physical embodiment The purpose of this critical historical analysis of representations of virtual reality is to examine how they might deny repress or overlook embodied experience Specifically the author will contend that embodiment is a fundamental aspect of immersion in virtual reality rather than something which is to be transcended In this way the book aims to challenge distorted ideas about transcendence and productively contribute to debates about embodiment and technology

Covering Extended Reality Technologies in the Media Emma Kaylee Graves, 2023-12-28 This book presents a study of the news coverage of extended reality technologies virtual augmented and mixed reality or XR and how this news corresponds with the marketing of XR products Focusing on a group of recently emerging technological products the book offers in depth analysis of the news coverage of XR technologies and explores the overlap between news discourse and promotional discourse by comparing the way these products are framed in the news and their marketing materials Using both quantitative and qualitative data it discusses the topics covered in XR news as well as the sources used and the specific framing techniques that appear in both XR news and marketing materials In addition to these findings it also provides a set of frame categories that can be used by other researchers analysing the media coverage of emerging technologies Ultimately arguing that the news represents XR in such a way that treats readers as consumers instead of citizens prioritising the interests of XR companies rather than news audiences this book will be of interest to students and researchers in media and communications discourse studies journalism PR and marketing and innovation studies as well as XR practitioners

Infrastructures of Reality: Metaverse Stories, Spaces, Bodies Chris Hesselbein, Paolo Bory, 2025-08-09 This open access book focuses on two dimensions of the development of the metaverse that are crucial to reality namely spatiality and embodiment Metaversal technologies are thought to fundamentally affect both our spaces and bodies which are two central aspects of the constitution of social reality Both spatiality and embodiment are core elements of world making that are being pulled into the ambit of metaversal projects On the one hand metaversal technologies are profoundly spatial in the sense that they render space in virtual form or overlay digital layers onto pre existing physical spaces On the other hand metaversal technologies are directly geared towards the body in that they not only seek to extend or expand our embodied senses and enplace our bodies in virtual spaces but they also seek to capture their behaviours and actions on a far more granular level This can create new opportunities in terms of work social interaction and leisure but can also open our bodies up to new tech driven interventions and control Whether in the form of VR or AR such technologies not

only reproduce space but also rely on making spaces more legible and open to automated interventions Taken together the metaversification of spaces and bodies gives rise to crucial questions about the goals and implications of metaversal developments by large technology companies and about the relationship between the developments of the metaverse and AI systems Drawing on our combined background and expertise in Science and Technology Studies and the History of Media and Communication we critically analyse the development of metaversal technologies and platforms by discussing a broad set of developments and examples from a wide range of technology and gaming companies Written in clear concise and accessible language and combining and applying novel theoretical frameworks and concepts to a currently emergent phenomenon this book will find a large audience not only within academic and professional circles but also in popular culture

Spaces Mapped and Monstrous Nick Jones,2020-04-21 Digital 3D has become a core feature of the twenty first century visual landscape Yet 3D cinema is a contradictory media form producing spaces that are highly regimented and exhaustively detailed it simultaneously relies upon distortions of vision and space that are inherently strange Spaces Mapped and Monstrous explores the paradoxical nature of 3D cinema to offer a critical analysis of an inescapable part of contemporary culture Considering 3D s distinctive visual qualities and its connections to wider digital systems Nick Jones situates the production and exhibition of 3D cinema within a web of aesthetic technological and historical contexts He examines 3D s relationship with computer interfaces virtual reality and digital networks as well as tracing its lineage to predigital models of visual organization Jones emphasizes that 3D is not only a technology used in films but also a tool for producing controlling and distorting space within systems of surveillance corporatization and militarization The book features detailed analysis of a wide range of films including Avatar 2009 Goodbye to Language 2014 Love 2015 and Clash of the Titans 2010 demonstrating that 3D is not merely an augmentation of 2D cinema but that it has its own unique properties Spaces Mapped and Monstrous brings together media archaeology digital theory and textual analysis to provide a new account of the importance of 3D to visual culture today

Digital Reality Melanie Chan,2020-09-17 As contemporary scholars journalists and commentators have indicated mobile digital devices promote a constant shift of attention between the world around us and the stimulations afforded by screen based interfaces Investigating these uniquely contemporary hybrid interactions Melanie Chan posits that while digital technologies are part of a long and historic trajectory they nonetheless may instigate new forms of corporeal practices and experiences How might continuous engagement with mobile devices and associated software impact our perception of sensory embodied experience Drawing upon existing scholarship around mobile media and new media Digital Reality explores digital technologies as phenomena observable items such as such as smart phones handsets consoles head mounted displays and goggles in the light of theories of reality and corporeality In so doing the book highlights the qualitative dimensions of our sense of aliveness movement and interaction within a range of environments virtual real or hybrid Ultimately the book illuminates how our sense of shared objective

reality changes due to hybrid forms of reality **Masculinity in Contemporary Science Fiction by Men** Sara Martín, 2025-05-30 *Masculinity in Contemporary Science Fiction by Men* No Plans for the Future is the first comprehensive study of the self representation of men in SF novels published in the twenty first century by male authors Exploring a broad selection of writers and works the fourteen chapters present a panoramic overview of men s contributions to current SF and explore their slow but noticeable progress in the representation of gender The impact of feminism and gender studies and the demands of readers have profoundly transformed men s SF which now presents far more caring and vulnerable male characters The old stereotypes are being replaced by a collective reflection on how men and masculinity are changing though the lack of a common agenda results in novels that while exciting and often challenging sometimes miss the chance to imagine a better anti patriarchal pro feminist future for men and for all human beings The authors analysed include Robert Charles Wilson Geoff Ryman Samuel R Delany Richard K Morgan John Scalzi Iain M Banks Ernest Cline James S A Corey Colson Whitehead Andy Weir Daniel H Wilson Ian McDonald Yoon Ha Lee Tade Thompson Neal Stephenson and Kim Stanley Robinson **Communication Technology Update and Fundamentals** August E.
