Handbook of Intelligent Automation Systems Using Computer Vision and Artificial Intelligence Rupali Gill, Susheela Hooda, Durgesh Srivastava, Shilpi Harnal, 2025-07-22 The book is essential for anyone seeking to understand and leverage the transformative power of intelligent automation technologies providing crucial insights into current trends challenges and effective solutions that can significantly enhance operational efficiency and decision making within organizations Intelligent automation systems also called cognitive automation use automation technologies such as artificial intelligence business process management and robotic process automation to streamline and scale decision making across organizations Intelligent automation simplifies processes frees up resources improves operational efficiencies and has a variety of applications Intelligent automation systems aim to reduce costs by augmenting

the workforce and improving productivity and accuracy through consistent processes and approaches which enhance quality improve customer experience and address compliance and regulations with confidence Handbook of Intelligent Automation Systems Using Computer Vision and Artificial Intelligence explores the significant role current trends challenges and potential solutions to existing challenges in the field of intelligent automation systems making it an invaluable guide for researchers industry professionals and students looking to apply these innovative technologies Readers will find the volume Offers comprehensive coverage on intelligent automation systems using computer vision and AI covering everything from foundational concepts to real world applications and ethical considerations Provides actionable knowledge with case studies and best practices for intelligent automation systems computer vision and AI Explores the integration of various techniques including facial recognition natural language processing neuroscience and neuromarketing Audience The book is designed for AI and data scientists software developers and engineers in industry and academia as well as business leaders and entrepreneurs who are interested in the applications of intelligent automation systems Low Vision Rehabilitation Mitchell Scheiman,Maxine Scheiman,Steven Whittaker,2007 Presents an emerging model in which occupational therapists practice as part of a team of vision rehabilitation professionals serving adults with low vision Occupational therapists offer a unique contribution to the vision rehabilitation team with a focus on meaningful occupational goals the incorporation of occupation into therapy and the orchestration of environmental social and non visual personal factors into a treatment plan The authors have developed a practical and straightforward text outlining an evaluation approach to interventions that focus on recovering occupational performance in adults **Introduction to Vision Training** Nadia Jankielsohn,2024-10-21 This book addresses the limited information on vision training and the importance of having knowledge of superior visual skills in our everyday individualised environment including the classroom workspace and sports setting It is an instruction manual explaining vision training in terms of what it can be used for and who can benefit from it The manual provides examples of over 200 exercises of 23 different visual skills covering fundamental and advanced skills also including visual perceptual skills and sport specific skills It explains the tests that an eye care professional can do to determine the level of a patient athlete s visual skills to regulate where improvement needs to be done Written in a concise manner and supplemented with insightful visual materials the book will allow the reader to formulate an individualised program according to the needs of the patient athlete **Human Factors Engineering Bibliographic Series** ,1966 **Supporting Requirements Communication for Shared Understanding by Applying Vision Videos in Requirements Engineering** Oliver Karras ,2021-05-15 Requirements engineering RE has the overall goal of establishing the vision of the system in its relevant context For this goal all stakeholders must disclose discuss and align their mental models of the system by explicitly communicating their goals ideas needs and expectations This procedure serves to develop and negotiate a shared understanding and is called requirements communication In this thesis I analyze the application of videos as a documentation option in RE to

support effective requirements communication for shared understanding Videos used for this purpose are called vision videos Based on a technology transfer process I develop a candidate solution consisting of the two concepts video as a by product and awareness and guidance The first concept supports the revision of RE practices by integrating video production and use to obtain videos as a by product with low effort and sufficient quality The second concept helps software professionals with video production and use by creating awareness regarding video quality and providing guidance on how to proceed Each concept is first validated in academia before the entire candidate solution is validated in a case study in the industry The findings from academia and industry indicate that the candidate solution helps software professionals to gain the required awareness knowledge and ability to produce and use vision videos at moderate costs and with sufficient quality These videos are suitable for the intended purpose of supporting requirements communication for shared understanding

Valuing Deaf Worlds in Urban India Michele Ilana Friedner, 2015-06-09 Although it is commonly believed that deafness and disability limits a person in a variety of ways *Valuing Deaf Worlds in Urban India* describes the two as a source of value in postcolonial India Michele Friedner argues that

the experiences of deaf people offer an important portrayal of contemporary self making and sociality under new regimes of labor and economy in India Friedner contends that deafness actually becomes a source of value for deaf Indians as they interact with nongovernmental organizations with employers in the global information technology sector and with the state In contrast to previous political economic moments deaf Indians increasingly depend less on the state for education and employment and instead turn to novel and sometimes surprising spaces such as NGOs multinational corporations multilevel marketing businesses and churches that attract deaf congregants They also gravitate towards each other Their social practices may be invisible to outsiders because neither the state nor their families have recognized Indian Sign Language as legitimate but deaf Indians collectively learn sign language which they use among themselves and they also learn the importance of working within the structures of their communities to maximize their opportunities Valuing Deaf Worlds in Urban India analyzes how diverse deaf people become oriented toward each other and disoriented from their families and other kinship networks More broadly this book explores how deafness deaf sociality and sign language relate to contemporary society
