Visual Impairments National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Disability Determination for Individuals with Visual Impairments, 2002-08-17 When children and adults apply for disability benefits and claim that a visual impairment has limited their ability to function the U S Social Security Administration SSA is required to determine their eligibility To ensure that these determinations are made fairly and consistently SSA has developed criteria for eligibility and a process for assessing each claimant against the criteria Visual Impairments Determining Eligibility for Social Security Benefits examines SSA s methods of determining disability for people with visual impairments recommends changes that could be made now to improve the process and the outcomes and identifies research needed to develop improved methods for the future The report assesses tests of visual function including visual acuity and visual fields whether visual impairments could be measured directly through visual task performance or other means of assessing disability These other means include job analysis databases which include information on the importance of vision to job tasks or skills and measures of health related quality of life which take a person centered approach to assessing visual function testing of infants and children which differs in important ways from standard adult tests

Parker,2003 Now in its second edition this book presents the latest theories concepts issues and practices related to the career development of people with disabilities You'll get the most recent developments in legislation affecting employment the business perspective on disability occupational and labor market information and much more This text is essential for rehabilitation and vocational counselors as well as for educators and researchers In addition Work and Disability is ideal for use in graduate and advanced undergraduate courses Help individuals with disabilities understand the complex nature of work not only to attain and maintain work but to help define themselves and their place in society Publisher Social Security Handbook Claitors Publishing Division,2006 United States Code Annotated United States,2007 **Journal of Disability Policy Studies** ,2010 Social Security Handbook Bernan Press,2006-01-31 Contains official authoritative data collected and compiled from Social Security Administration sources about Social Security benefit programs Published privately to fill the void created when the Administration discontinued its own print version **West's Federal Practice Digest 4th** ,2003 Tax, Estate & Financial Planning for the Elderly John J. Regan,1985 **New, Improved, Comprehensive, and Automated Driver's License Test and Vision Screening System** Sandy H. Straus,2005 This one of a kind comprehensive study highlights the importance of automated testing techniques and the significance of vision screening measures other than standard visual acuity testing for assessing all drivers and in particular at risk drivers and older drivers Non automated tests tend to be subjective time consuming costly and heavily reliant on the experience of the examiner Due to the high collision injury and fatality rates of all drivers in the State of Arizona and the disproportionate

number of at fault older drivers and collision risks in the States of Arizona and Florida new and automated screening methodologies and vision standards are now needed to promote road safety predict visual impairment and evaluate possible restriction or confiscation of driver s licenses This study demonstrates that environmental factors and manner of collisions increase in collision involvement for drivers between ages 50 to 59 years in both Arizona and Florida Drivers age 80 to 89 years in both states are most likely at fault in collisions compared to all other age cohorts These results are consistent among drivers cited for collision involvement due to visual defects These findings which span an 11 year period from 1991 to 2001 not only apply to Arizona and Florida two states with some of the largest proportions of older individuals in the United States but as a global survey of motor vehicle bureau directors or their representatives in the United States Commonwealth of Puerto Rico United Kingdom Canada New Zealand and Australia illustrate any state country province territory commonwealth or nation with an increasing number of older drivers A pilot study to follow ultimately allows for the implementation of effective strategies for screening of visual impairment and eye disease in all Arizona drivers Snellen acuity the most widely used vision testing measure accounts for less than 0.1% of the visual field and fails to quantify contrast sensitivity and color vision Fink and Sadun 2004 two of several visual parameters needed for safe driving It is recommended that at risk and older drivers in Arizona be tested for vision through a newly designed system of measures provided by two automated tests to test vision condition and function and one driving simulator to assess eye status Hence it is integrated into a larger system and additional recommendations are provided as these relate to motor vehicle operation skills and cognition These automated systems and methodologies may ultimately serve as a prototype of transportation license testing improvements for all other states countries and agencies e.g. aviation rail maritime commercial vehicles etc to follow Such techniques may also reduce the incidence of fraudulent schemes and issuances of driver s licenses commercial driver s licenses and hazardous materials transportation licenses
