

Hello World

On the left you will see a Solution Explorer pane, containing all the relevant files and settings for your project.

Go to Project – Add New Item

This will bring up the following dialogue window:

Visual Studio will default to creating C++ files. While the vast majority of the code you write in this module will compile in C++, for the time being name the file main.c (rather than main.cpp).

Change the Name: text field to main.c
Click Add

This will create a new source file for your project called main.c

Paste the following code into the file:

```
#include <stdio.h>
#include <stdlib.h>

int main(int argc, char *argv[])
{
    printf("\nHello World \n\n");
    system("PAUSE");
    return 0;
}

Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT
