

Heidi: I've had those, the poster of the book. All pictures is going to appear in some of these pages every so often. As speech balloons such as this, I'll save my additional comments on the manuscript content as we go along. Great response, as you will see, facilitates much needed level of discussion.

I largely picture and words have been combined together in discussion since the creation of written language, and especially in picture language 123-24 that it is my claim that the full integration of words, images, and shapes into a single, unified communication unit is just now emerging in a human language.

Words are essential to most languages. They are conceptual steps in communication and supply the capacity to name objects and classify elements and to discuss abstractions.

Images, of course, are what we first think of when we think of visual language. But without an engagement with words and/or shapes, images are only conventional visual art, not visual language as it is defined in this book.

Shapes are different from images. They are more abstract. For several centuries, we have been combining them with words in form-imagery systems. The study of shapes and their imagination will work, and so images is an essential part of visual language.
