Vital Beauty Reclaiming Aesthetics In The Tangle Of Technology And Nature:

Vital Beauty Joke Brouwer, Arjen Mulder, Lars Spuybroek, 2012 Philosophers anthropologists political thinkers and artists take a closer look at what the idea of beauty can mean to their disciplines in an effort to redefine what beauty is and what it means to the design practice and art The book focuses on the question of how the age old notion of beauty can regain an importance appropriate to the 21st century

The Ethics of Animal Beauty Samantha Vice, 2023-10-10 The Ethics of Animal Beauty provides a novel account of the aesthetics of animals and explores the ethical implications of recognizing and admiring their beauty Samantha Vice argues that animation the aesthetic property of being an individual with a subjective perspective on the world is fundamental to any meaningful appreciation of animal beauty If we properly appreciate animation we are called on to respond to animals with respect care gratitude and wonder Applying this idea to contemporary practices such as trophy hunting and taxidermy and to our lived relationships with domestic companion animals Vice argues that the appreciation of animal beauty carries profound ethical consequences for our relations to our fellow creatures This perspective bears on questions of animal rights and ecocritical debates while also contributing to key discussions in aesthetics and its relation to moral imperatives

Academic and Professional Writing in an Age of Accountability Shirley Wilson Logan, Wayne H. Slater, 2018-12-27 What current theoretical frameworks inform academic and professional writing What does research tell us about the effectiveness of academic and professional writing programs What do we know about existing best practices What are the current guidelines and procedures in evaluating a program s effectiveness What are the possibilities in regard to future research and changes to best practices in these programs in an age of accountability Editors Shirley Wilson Logan and Wayne H Slater bring together leading scholars in rhetoric and composition to consider the history trends and future of academic and professional writing in higher education through the

lens of these five central questions The first two essays in the book provide a history of the academic and professional writing program at the University of Maryland Subsequent essays explore successes and challenges in the establishment and development of writing programs at four other major institutions identify the features of language that facilitate academic and professional communication look at the ways digital practices in academic and professional writing have shaped how writers compose and respond to texts and examine the role of assessment in curriculum and pedagogy An afterword by distinguished rhetoric and composition scholars Jessica Enoch and Scott Wible offers perspectives on the future of academic and professional writing This collection takes stock of the historical rhetorical linguistic digital and evaluative aspects of the teaching of writing in higher education Among the critical issues addressed are how university writing programs were first established and what early challenges they faced where writing programs were housed and who administered them how the language backgrounds of composition students inform the way writing is taught the ways in which current writing technologies create new digital environments and how student learning and programmatic outcomes should be assessed

Natura Urbana Matthew Gandy, 2022-03-08 A study of urban nature that draws together different strands of urban ecology as well as insights derived from feminist posthuman and postcolonial thought Postindustrial transitions and changing cultures of nature have produced an unprecedented degree of fascination with urban biodiversity The other nature that flourishes in marginal urban spaces at one remove from the controlled contours of metropolitan nature is not the poor relation of rural flora and fauna Indeed these islands of biodiversity underline the porosity of the distinction between urban and rural In *Natura Urbana* Matthew Gandy explores urban nature as a multilayered material and symbolic entity through the lens of urban ecology and the parallel study of diverse cultures of nature at a global scale Gandy examines the articulation of alternative and in some cases counterhegemonic sources of knowledge about urban nature produced by artists writers scientists as well as curious citizens including voices seldom heard in environmental discourse The book is driven by Gandy's fascination with spontaneous forms of urban nature ranging from postindustrial wastelands brimming with life to the return of such predators as wolves and leopards on the urban fringe Gandy develops a critical synthesis between different strands of urban ecology and considers whether urban political ecology broadly defined might be imaginatively extended to take fuller account of both the historiography of the ecological sciences and recent insights derived from feminist posthuman and postcolonial thought

guidance in a variety of architectural design projects Assessments of 29 buildings 10 libraries 10 museums and 9 university buildings from around the world Analyzing Eco Architecture Beyond Performance is essential reading for students

researchers and practitioners involved in the study and design of environmental architecture today **Beauty and the Gods** Hugo Shakeshaft,2025-03-25 How ideas and experiences of beauty informed human relationships with the divine in ancient Greece Beginning with the earliest Greek literature the epics of Homer and Hesiod beauty was seen as having a special connection with the divine The gods of ancient Greece were defined by their exceptional beauty even today to look like a Greek god is proverbial for human beauty In Beauty and the Gods Hugo Shakeshaft explores the relationship between the beautiful and divine in ancient Greece principally in the Archaic period ca 750 480 BCE Analysing evidence that ranges from poetry art and philosophical texts to architecture and the natural landscape Shakeshaft shows how ideas and experiences of beauty shaped Greek relations with the divine With a powerful call for the place of beauty and aesthetics in the writing of history Shakeshaft uncovers the cultural dialogue between beauty and the gods in a variety of contexts in the Archaic Greek world in forms of divine worship in poetry music and dance in attitudes to the natural environment and in architecture and art This early chapter of Greek history he argues holds an unrecognised key to understanding some long running threads in the histories of religion art and aesthetics from Plato s aesthetic theories to beauty s status in contemporary discourse Beauty s deep past and divine connection in ancient Greece can help us see beauty now in sharper focus

This Sacred Life Norman Wirzba,2021-10-14 In a time of climate change environmental degradation and social injustice the question of the value and purpose of human life has become urgent What are the grounds for hope in a wounded world This Sacred Life gives a deep philosophical and religious articulation of humanity s identity and vocation by rooting people in a symbiotic meshwork world that is saturated with sacred gifts The benefits of artificial intelligence and genetic enhancement notwithstanding Norman Wirzba shows how an account of humans as interdependent and vulnerable creatures orients people to be a creative healing presence in a world punctuated by wounds He argues that the commodification of places and creatures needs to be resisted so that all life can be cherished and celebrated Humanity s fundamental vocation is to bear witness to God s love for creaturely life and to commit to the construction of a hospitable and beautiful world **The**

Branding and Designing Disability Elizabeth DePoy, Stephen Gilson, 2014-06-27 Over the past fifty years design and branding have become omnipotent in the market and have made their way to other domains as well. Given their potential to divide humans into categories and label their worth and value, design and branding can wield immense but currently unharnessed powers of social change. Groups designed as devalued can be undesigned, redesigned, and rebranded to seamlessly and equivalently participate in community work and civic life. This innovative book argues that disability as a concept and category is created, reified, and segregated through current design and branding that begs for creative change. Transcending models of disability that locate it either as an embodied medical condition or as a socially constructed entity, this book challenges the very existence and usefulness of the category itself. Proposing and illustrating creative and responsible design, DePoy and Gilson include thinking and action strategies that are useful and potent for undesigning, redesigning, and rebranding to meet the full range of human needs and to enhance full participation in local through global communities. Divided into two parts, the first section presents a critical examination of disability as a designed and branded phenomenon, exploring what exactly is being designed and branded and how. The second part investigates the redesign of disability and provides principles for redesign and rebranding, illustrated with examples from high tech to place-based sustainable strategies. The book provides a unique and contemporary framework for thinking about disability as well as providing relevant design and branding guidance to designers and engineers interested in embodiment issues. Care Ethics and Art Jacqueline Millner, Gretchen Coombs, 2021-11-24 What would it mean to substitute care for economics as the central concern of politics? This anthology invites analysis, reflections, and speculations on how contemporary artists and creative practitioners engage with, interpret, and enact care in practices which might forge an alternative ethics in the age of neoliberalism. Interdisciplinary and innovative, it brings together contributions from artists, researchers, and practitioners who creatively consider how care can be practised in a range of contexts, including environmental ethics, progressive pedagogies, cultures of work, alternative economic models, death literacy, advocacy, parenting, and mothering, deep listening, mental health, disability, and craftivism. Care Ethics and Art contributes new modes of understanding these fields together with practical solutions and models of practice while also offering new ways to think about recent contemporary art and its social function. The book will benefit scholars and postgraduate research students in the fields of art, art history, and theory, visual cultures, philosophy, and gender studies, as well as creative and arts practitioners. *Is Architecture Art?* John Macarthur, 2024-10-31 Is architecture an art like literature or music? Or is it more akin to science or engineering? Can buildings be artworks just like paintings and sculptures, or does their fundamentally functional nature mean they cannot be considered pure works of art? Questions of architecture, art, and aesthetics do not allow for simple answers. But by asking such questions, we can usefully reveal the ways in which the concepts and meanings of architecture have changed over the centuries and how they continue

to change in the contemporary era *Is Architecture Art* explores the key conceptual questions about the aesthetic appreciation of architecture and its persistently contested status as an artform It engages the work of thinkers ranging from Hume and Kant to Adorno Tafuri and Rancière and draws on accessible and thought provoking accounts of historical and contemporary architectural and art theory Taking novel approaches to issues that will be familiar to the practising architect it shows how aesthetics and art theory can open up and illuminate architectural theory issue by issue *Is Architecture Art* will provoke discussion and debate among architects and architectural theorists and force a new understanding of the purpose of architectural practice in the contemporary era as the concepts of art the arts and of the creative economy have shifted and blurred as never before

Offsite Architecture Ryan E. Smith, John D. Quale, 2017-03-16 Architects have been intrigued by prefabricated construction since the early twentieth century Recent advances in design engineering and manufacturing processes have led to a significant expansion in the use of pre assembled components which are fitted to finished structures on site Collectively such processes are becoming known as offsite construction A ground breaking text *Offsite Architecture* establishes the current and future state of thinking in this field A range of the most highly regarded thinkers and practitioners from around the globe share their ideas and practical findings on offsite prefabrication examining theory and practice opportunities and challenges successes and failures A timely response to the growing interest in this method the book provides the fundamental basis for a critical reflective approach to offsite architecture Contributions from both academics and professionals make *Offsite Architecture* required reading for practitioners as well as students taking courses in architecture prefabrication construction and engineering

Non-Representational Methodologies Phillip Vannini, 2015-02-11 Non representational theory is one of the contemporary moment's most influential theoretical perspectives within social and cultural theory It is now widely considered to be the logical successor of postmodern theory the logical development of post structuralist thought and the most notable intellectual force behind the turn across the social and cultural sciences away from cognition meaning and textuality And yet it is often poorly understood This is in part because of its complexity but also because of its limited

treatment in the few volumes chiefly dedicated to it Theories must be useful to researchers keen on utilizing concepts and analytical frames for their personal interpretive purposes How useful non representational theory is in this sense is yet to be understood This book outlines a variety of ways in which non representational ideas can influence the research process the very value of empirical research the nature of data the political value of data and evidence the methods of research the very notion of method and the styles genres and media of research
