The Retina and Its Disorders Joseph Besharse, Dean Bok, 2011-04-25 This selection of articles from the Encyclopedia of the Eye covering retina optics optic nerve and comparative topics constitutes the first reference for scientists post docs and graduate students with an interest beyond standard textbook materials It covers the full spectrum of research on the retina from the basic biochemistry of how nerve cells are created to information on neurotransmitters comparisons of the structure and neuroscience of peripheral vision systems in different species and all the way through to injury repair and other clinical applications The first single volume to integrate comparative studies into a comprehensive resource on the neuroscience of the retina Chapters are carefully

selected from the Encyclopedia of the Eye by one of the world's leading vision researchers. The best researchers in the field provide their conclusions in the context of the latest experimental results.

Immunology, Inflammation and Diseases of the Eye Darlene A. Dartt, 2011-05-05 This selection of articles from the Encyclopedia of the Eye provides a comprehensive overview of immunological features, diseases, and inflammation of the eye and its support structures and organs. Rather than taking an immunological focus that is strictly suitable for clinicians, the volume offers a considerable basic science background and addresses a broad range of topics: the immune system of the eye, its various disorders, mechanisms of inflammation of the eye, and visual system treatment wound healing mechanisms, stem cells, and more. The first single volume to integrate comparative studies into a comprehensive resource on the neuroscience of ocular immunology. Chapters are carefully selected from the Encyclopedia of the Eye by the world's leading vision researchers. The best researchers in the field provide their conclusions in the context of the latest experimental results.

Applied Pathology for Ophthalmic Microsurgeons Gottfried O.H. Naumann, L. Holbach, F.E. Kruse, 2008-04-05 Written and edited by the world famous expert G O H Naumann, this textbook delves into the details of ocular structures such as the nuances of morphology, surgical anatomy, and pathology. The text covers unique features of intraocular surgery in closed system and open eye contexts. It goes on to cover crucial aspects of restoring the anterior chamber. Then it delineates the spectrum of potential complications in pseudo exfoliation syndromes as well as the most vulnerable cell populations. Readers are also treated to the features of normal and pathologic wound healing after non mechanical laser and mechanical interventions. Brilliant artwork and sketches illustrate the complex pathology.
