The Political Battle of the Sexes Leslie A. Caughell, 2016-03-25 Sex remains one of the most salient demographic dividing points in American politics today President Obama has women particularly unmarried women to thank for his re election victory The gender difference in voter support for the Democratic and Republican presidential candidates grew from twelve points in 2008 to eighteen points in 2012 This gender gap in candidate preference likely emerges because of gender gaps in policy preferences Yet despite much scholarly and popular interest in this topic the cause or causes of gender gaps in policy preference remain unclear The Political Battle of the Sexes Exploring the Sources of Gender Gaps in Policy Preferences examines gender gaps in policy preferences in the United States outlines their form and explores their causes This work makes four contributions to the literature on gender gaps First it provides the first comprehensive look at gender gaps across time and various issue areas completed since the 1980s Second it provides a theoretical framework for explaining the causes of gender gap emergence that incorporates both nature biology and nurture socialization and provides the basis with which to predict the attitudes on which gender gaps will likely emerge Third it explores the causes of gender gaps in foreign and social policy two of the policy domains where gender gaps continue to increase Finally it introduces a new way of conceptualizing biology based on emerging research in the hard sciences

Studying gender gaps remains difficult Women comprise a very diverse group and are divided by far more factors than the sex categorization that unites them However electoral realities demand that scholars studying political behavior pay attention to sex based differences in political preferences Women exhibit consistent preference tendencies relative to men and women remain more likely to show up on Election Day than men As such gender gaps have substantial political and practical implications for women in the United States And while explaining their causes requires drawing from a wide array of fields ranging from biology to economics understanding the origins and consequences of gender gaps does much to further empirical research in public opinion and mass behavior

Breaking the Political Glass Ceiling Barbara Palmer,Dennis Simon,2010-11-01

Why has the integration of women into Congress been so slow Is there a political glass ceiling for women Although women use the same strategic calculations as men to decide when to run the decision regarding where to run is something else While redistricting has increasingly protected incumbents it also has the unintended consequence of shaping the opportunities for female candidates The political geography and socio economic profile of districts that elect women differ substantially from districts that elect men With data on over 10 000 elections and 30 000 candidates from 1916 to the present Palmer and Simon explore how strategy and the power of incumbency affect women s decisions to run for office Breaking the Political Glass Ceiling is the most comprehensive analysis of women in congressional elections available The Second Edition is fully updated to reflect the pivotal 2006 mid term elections including Nancy Pelosi s rise to Speaker of the House Hillary Clinton s bid for the presidency and a record number of women serving as committee chairs Additionally the authors have created a website found at politicsandwomen.com to highlight key features of the book and provide updates throughout the election cycle
