Positive Existential Psychology for the Prevention of Extremism Alain Ruffion, 2025-07-30 Many scientific works and studies have focused on the phenomena of extremism and violent radicalization However very few resources exist to effectively address this issue from an educational perspective The diagnoses are often fragmented and give prominence to geopolitical and socio political factors Yet an interdisciplinary analysis of the processes of extremism and radicalization indicates the central role of biographical psychological or even psychopathological variables and traumas How can we draw deep lessons from this to innovate in education and truly give ourselves the means to prevent these processes of extremism and radicalization This book deliberately choosing positive and existential psychology as a resource proposes to answer this question with the support of scientific and creative resources that finally address and respond to the root causes These resources are adapted to socio educational professions and understandable by parents They finally restore courage ideas and motivating and positive approaches for all those who want to take up this increasingly widespread and threatening challenge within our societies At the same time these resources make it possible to work on the transmission of values strengths and to contribute to the mental health and fulfilment of our youth a capital theme if there ever was one The Routledge International Handbook of Multidisciplinary Perspectives on Character Development, Volume I Michael D.
