Why War? Richard Overy,2024-06-04 An Economist Best Book of the Year Richard Overy is one of the world s finest military historians His book is timely for those interested in preventing war Gen Mark Milley U S Army retired 20th Chairman of the Joint Chiefs of Staff Army magazine Why has war been such a consistent presence throughout the human past A leading historian explains drawing on rich examples and keen insight Richard Overy is not the first scholar to take up the title question In 1931 at the request of the League of Nations Albert Einstein asked Sigmund Freud to collaborate on a short work examining whether there was a way of delivering mankind from the menace of war Published the next year as a pamphlet entitled Why War it conveyed Freud s conclusion that the death drive made any deliverance impossible the psychological impulse to destruction was universal in the animal kingdom The global wars of the later 1930s and 1940s seemed ample evidence of the dismal conclusion A preeminent historian of those wars Overy brings vast knowledge to the title question and years of experience unraveling the knotted motivations of war His approach is to separate the major drivers and motivations and consider the ways each has contributed to organized conflict They range from the impulses embedded in human biology and psychology to the incentives to conflict developed through cultural evolution to competition for resources conflicts stirred by the passions of belief the

effects of ecological stresses the drive for power in leaders and nations and the search for security The discussions show remarkable range delving deep into the Neolithic past through the twentieth century world wars and up to the current conflict in Ukraine The examples are absorbing from the Roman Empire's voracious appetite for resources to the impulse to power evident in Alexander the Great Napoleon and Hitler The conclusion is not hopeful but Overy's book is a gift to readers a compact judicious engrossing examination of a fundamental question **Journal of Anthropological Research**, 2016

Beyond War Albert García-Piquer, Assumpció Vila-Mitjà, 2016-06-22 The long standing debate over the origins of violence has resurfaced over the last two decades There has been a proliferation of studies on violence from both cross cultural and ethnographic and prehistoric perspectives based on a reading of archaeological and bioarchaeological records in a variety of territories and chronologies The vast body of osteoarchaeological and architectural evidence reflects the presence of interpersonal violence among the first farmer groups throughout Europe and even earlier between hunter gatherer societies of the Mesolithic The studies in *Beyond War* present the necessity of rethinking the concept of violence in archaeology This overcomes the old conception that limits violence to its most evident expressions in war and intra or extra group conflict opening up the debate on violence which allows the advancement of knowledge of the social life and organization of prehistoric societies Determining archaeological indicators to identify violent practices and to analyse their origin and causes is fundamental here and represents the only way to find out when and under what historical conditions prehistoric societies began to organize themselves by exercising structural violence **The Psychology of Resolving Global Conflicts:**

Prevention of war Appendix 40 warring peoples Glossary Cross-cultural Approaches to Research on Aggression and Reconciliation Jesús Martín Ramírez, Deborah South Richardson, 2001 Violence concerns humans Preparing responsible citizens demands attention to the causes and consequences of violent action But reducing and preventing violence requires an understanding of the complexity of the phenomenon and recognition of its multiple causes A better knowledge of aggression is not only a window into an understanding of humanity but it also informs us that violence involves an intensely emotional experience on the parts of perpetrators victims and witnesses Perceived cultural differences are often cited as the reason for armed conflict and war This volume examines violence in a cross cultural vein allowing for an exploration of the different causes and contexts for violence Ethno-analogy and the Reconstruction of Prehistoric Artefact Use and Production Martin Porr, 1999 A collection of 19 papers from a conference held in Tuebingen in 1997 on historical ethnographic and experimental approaches to the interpretation of prehistoric artefacts Cross cultural case studies from both the Old and New Worlds and a diverse range of approaches and ideas makes this a most interesting group of studies The focus is not on theoretical debates but on different ways of studying the use and production of prehistoric artefacts and their distribution Text in English with abstracts in English French and German *Handbook of Aggressive Behavior Research* Caitriona Quin, Scott Tawse, 2009 Aggression is a complex social behaviour with multiple causes In psychology as well as other social and behavioural sciences aggression refers to behaviour between members of the same species that is intended to cause pain or harm Aggression takes a variety of forms among humans and can be physical mental or verbal Aggression should not be confused with assertiveness however although the terms are often used interchangeably There are two broad categories of aggression These include hostile affective or retaliatory aggression and instrumental predatory or goal oriented aggression Empirical research indicates that there is a critical difference between the two both psychologically and physiologically Some research indicates that people with tendencies toward affective aggression have lower IQs than those with tendencies toward predatory aggression If only considering physical aggression males tend to be more aggressive than females This new book gathers the latest research from around the world in this field *The Human Potential for Peace* Douglas P. Fry, 2006 In *The Human Potential for Peace An Anthropological Challenge to Assumptions about War and Violence* renowned anthropologist Douglas P Fry shows how anthropology with its expansive time frame and comparative orientation can provide unique insights into the nature of war and the potential for peace Challenging the traditional view that humans are by nature primarily violent and warlike Professor Fry argues that along with the capacity for aggression humans also possess a strong ability to prevent limit and resolve conflicts without violence He draws on data from cultural anthropology archaeology and sociology as well as from behavioral ecology and evolutionary biology to construct a biosocial argument that challenges a host of commonly held assumptions Violent Interactions in the Mesolithic Mirjana Roksandic, 2004 It has been said of the Mesolithic that this period heralded an increase in incidents of violence and warfare These nine papers aim
