Violent Geographies Fear Terror And Political Violence:

Violent Geographies Derek Gregory, Allan Pred, 2013-10-18 *Violent Geographies* is essential to understanding how the politics of fear, terror and violence in being largely hidden geographically can only be exposed in like manner. The War on Terror finally receives the coolly critical analysis its ritual invocation has long required. John Agnew, Professor of Geography, UCLA. Urgent, passionate and deeply humane, *Violent Geographies* is uncomfortable but utterly compelling reading. An essential guide to a world splintered and wounded by fear and aggression, this is geography at its most politically engaged, historically sensitive and intellectually brave. Ben Highmore, University of Sussex. This is what a public geography should be: all about acute analysis of momentous issues of our time in an accessible language. Gregory and Pred have assembled a peerless group of critical geographers whose essays alter conventional understandings of terror, violence and fear. No mere gazetteer, *Violent Geographies* shows how place, space and landscape are central components of the real and imagined practices that constitute organised violence past and present. If you thought terror, violence and fear were the professional preserve of security analysts and foreign affairs experts, this book will force you to think again. Noel Castree, School of Environment and Development, Manchester University. A studied, passionate and moving examination of the way in which the violent logics of the War on Terror have so quickly shuttered and reorganized the spaces of this planet on its different scales. From the book emerges a critical new cartography that clearly charts an archipelago of a large multiplicity of wild and tamed places as well as black holes within and between which we all struggle to live. Eyal Weizman, Director, Goldsmiths College.

The Wiley Blackwell Companion to Political Geography John A. Agnew, Virginie Mamadouh, Anna Secor, Joanne Sharp, 2017-07-24 *The Wiley Blackwell Companion to Political Geography* aims to account for the intellectual and worldly developments that have taken place in and around political geography in the last 10 years. Bringing together established names in the field as well as new scholars, it highlights provocative theoretical and conceptual debates on political geography from a range of global perspectives. Discusses the latest developments and places increased emphasis on modes of thinking, contested key concepts and on geopolitics, climate change and terrorism. Explores the influence of the practice-based methods in geography and concepts including postcolonialism, feminist geographies, the notion of the Anthropocene and new understandings of the role of non-human actors in networks of power. Offers an accessible introduction to political geography for those in allied fields including political science, international relations and sociology.

The Ashgate Research Companion to Critical Geopolitics Merje Kuus, 2016-04-01 Since the late 1980s, critical geopolitics has gone from being a radical critical perspective on the disciplines of political geography and international relations theory to becoming a recognised area of research in its own right. Influenced by poststructuralist concerns with the politics of representation, critical geopolitics considers the ways in which the use of particular discourses shape political practices. Initially, critical geopolitics analysed the practical geopolitical language of the elites and intellectuals of statecraft.

Subsequent iterations have considered the role that popular representations of the international political world play. As critical geopolitics has become a more established part of political geography, it has attracted ever more critique from feminists for its apparent blindness to the embodied effects of geopolitical praxis and from those who have been uncomfortable about its textual focus while others have challenged critical geopolitics to address alternative resistant forms of geopolitical practice. Again, critical geopolitics has been reworked to incorporate these challenges and the latest iterations have encompassed normative agendas, non-representational theory, emotional geographies and affect. It is against the vibrant backdrop of this intellectual development of critical geopolitics as a subdiscipline that this Companion is set. Bringing together leading researchers associated with the different forms of critical geopolitics, this volume produces an overview of its achievements, limitations and areas of new and potential future development. The Companion is designed to serve as a key resource for an interdisciplinary group of scholars and practitioners interested in the spatiality of politics.

Key Concepts in Historical Geography John Morrissey, David Nally, Ulf Strohmayer, Yvonne Whelan, 2014-02-17. This ambitious volume reviews the best recent work in historical geography. It demonstrates how a dual sense of history and geography is necessary to understand such key areas of contemporary debate as the inter-relationship between class, race and gender, the character of nations and nationalism, the nature and challenges of urban life, the legacies of colonialism and the meaning and values attributed to places, landscapes and environments. Mike Heffernan, University of Nottingham. Key Concepts in Historical Geography forms part of an innovative set of companion texts for the Human Geography sub-disciplines. Organized around 24 short essays, it provides a cutting-edge introduction to the central concepts that define contemporary research in Historical Geography. Involving detailed and expansive discussions, the book includes an introductory chapter providing a succinct overview of the recent developments in the field, 24 key concepts entries with comprehensive explanations, definitions and evolutions of the subject. Pedagogic features that enhance understanding, including a glossary, figures, diagrams and further reading. Key Concepts in Historical Geography is an ideal companion text for upper-level undergraduate and postgraduate students and covers the expected staples from the discipline, from people, space and place to colonialism and geopolitics, in an accessible style. Written by an internationally recognized set of authors, it is an essential addition to any human geography student's library.

Theatre on Terror Ariane de Waal, 2017-05-08. In a moment of intense uncertainty surrounding the means, ends and limits of countering terrorism, this study approaches the recent theatres of war through theatrical stagings of terror. *Theatre on Terror: Subject Positions in British Drama* charts the terrain of contemporary subjectivities both at home and on the front line. Beyond examining the construction and contestation of subject positions in domestic and sub-urban settings, the book follows border-crossing figures to the shifting battlefields in Iraq and Afghanistan. What emerges through the analysis of twenty-one plays is not a dichotomy but a dialectics of home and front where fluid, uncontrollable subjects are constantly pushing the contours of conflict. Revising the critical consensus that post-9/11 drama primarily engages with the

real Ariane de Waal argues that these plays navigate the complexities of the discourse rather than the historical or social realities of war and terrorism British theatre on terror negotiates inflects and participates in the discursive circulation of stories idioms controversies testimonies and pieces of mis information in the face of global insecurities Enemies of Humanity Isaac Land,2008-05-15 This collection of essays offers a fresh perspective on the definition and origins of terrorism broadening the field to include slave revolts and urban tensions and considering how the war on terrorism had already matured by 1870 as a way to justify often bloody campaigns against labor unions nationalist freedom fighters and reformers

Violence Today Leo Panitch,Colin Leys,2008 Is this a new age of barbarism The scale and pervasiveness of violence today calls urgently for serious analysis of the war on terror and counter insurgencies terror and counter terror suicide bombings and torture civil wars and anarchy urban gang warfare and the persistence of chronic violence against women *Jesus in an Age of Terror* James G. Crossley,2008 This book applies the work of Noam Chomsky Edward Herman Edward Said and several others on international politics and the supportive role of the media intellectuals and academics to contemporary Christian origins and New Testament scholarship Part One looks at the ways in which New Testament and Christian origins scholarship has historically been influenced by its political and social settings over the past hundred years or so Moving on to the present the following chapter then applies Herman and Chomskys propaganda model of manufacturing consent in the mass media to the recent explosion of biblical scholars writing on the internet in particularly biblio bloggers It is clear that political views in biblio blogging conform strikingly to the emphases that come through in Herman and Chomskys analysis of the mass media and intellectuals particularly with the standard lines on the war on terror and views on the contemporary Middle East The rest of the book takes up modified key areas of the propaganda model in more detail Part Two looks at the Orientalist rhetoric of clashing civilisations and how this relates to the war on terror and the creation of Islam Arabs Middle East etc as the Great Enemy in the media and relevant intellectual thought since the 1970s and to use Derek Gregorys phrase hideously emboldened in the war on terror The next chapter then shows how this context has had a highly noticeable impact on the use of social sciences in New Testament and Christian origins scholarship in particular the stark generalisations of scholars using cultural social anthropology based on contemporary studies of the Middle East Disturbingly some of this scholarship has many rhetorical links with Anglo American foreign policy interests in the Middle East and beyond making some politically charged statements that cohere closely with recent intellectual defences of actions in Iraq Palestine and beyond Part Three looks at issues of Palestine and Israel in the media alongside Christian secular and relevant intellectual thought since the Six Day War of 1967 focusing in particular on the dramatic shift towards widespread support for Israel This also includes an analysis of the recent and controversial case of Nadia Abu el Hajs tenure at Barnard The following chapter shows how this interest in Israel has had a profound impact on historical Jesus and Christian origins studies particularly the strange emphasis on Jewishness and misplaced allegations of antisemitism since the 1970s Despite

the shift in support of Israel this is rarely done for love of Jews Judaism Israel or Israelis because there remains a notable cultural political and religious superiority in Anglo American scholarship While owing much also to an Orientalist tradition this too is strongly echoed in scholarship of Christian origins where for all the emphasis on the Jewishness of Jesus and the first Christians it is extremely common to find Jesus or the first Christians being better than Judaism or overriding key symbols of Judaism as constructed by scholarship done ironically by frequent ignoring of relevant Jewish texts The end results of contemporary scholarship are not dramatically different from the results of the anti Jewish and antisemitic scholarship of much of the twentieth century

Democracy in Crisis Stella Gaon, 2009 This volume explores the political implications of violence and alterity radical difference for the very practice of democracy and reformulates the possibility of community that democracy is said to imply Most significantly contributors intervene in traditional democratic theory by boldly contesting the widely held assumption that increased inclusion tolerance and cultural recognition are democracy's sufficient conditions Rather than simply inquiring how best to expand the demos they investigate how claims to self determination identity and sovereignty are a problem for democracy and how paradoxically alterity may be its greatest strength Drawing largely on the Left continental tradition contributions include an appeal to the tension between fear and love in the face of anti-Semitism in Poland an injunction to rethink the identity difference binary that dominates liberal democratic thought a critique of the canonical democratic we and a call for an ethics and a politics of dissensus in democratic struggles against racist and sexist oppression The authors thus mobilize some of the most powerful critical insights emerging across the social sciences and humanities from anthropology critical legal studies critical race theory and post colonial studies Marxism psychoanalysis social and political thought philosophy and sociology to reconsider the meaning and possibility of democracy in the face of its contemporary crisis The book directly appeal to students and scholars interested in cutting edge critical reflection on the empirical phenomenon of increased violence in the West provoked by radical difference and on the possibility of radical political theoretical critique
