Big Data and Blockchain Technology for Secure IoT

Applications Shitharth Selvarajan, Gouse Baig Mohammad, Sadda Bharath Reddy, Praveen Kumar Balachandran, 2024-12-19

Big Data and Blockchain Technology for Secure IoT Applications presents a comprehensive exploration of the intersection between two transformative technologies big data and blockchain and their integration into securing Internet of Things IoT applications As the IoT landscape continues to expand rapidly the need for robust security measures becomes paramount to safeguard sensitive data and ensure the integrity of connected devices This book delves into the synergistic potential of leveraging big data analytics and blockchain s decentralized ledger system to fortify IoT ecosystems against various cyber threats ranging from data breaches to unauthorized access Within this groundbreaking text readers will uncover the foundational principles underpinning big data analytics and blockchain technology along with their respective roles in enhancing IoT security Through insightful case studies and practical examples this book illustrates how organizations across diverse industries can harness the power of these technologies to mitigate risks and bolster trust in IoT deployments From real time monitoring and anomaly detection to immutable data storage and tamper proof transactions the integration of big data and blockchain offers a robust framework for establishing secure transparent and scalable IoT infrastructures Furthermore this book serves as a valuable resource for researchers practitioners and policymakers seeking to navigate the complexities of IoT security By bridging the gap between theory and application this book equips readers with the knowledge and tools necessary to navigate the evolving landscape of interconnected devices while safeguarding against emerging cyber threats With contributions from leading experts in the field it offers a forward thinking perspective on harnessing the transformative potential of big data and blockchain to realize the full promise of the IoT securely

Cyber-Physical

Systems Nonita Sharma, L K Awasthi, Monika Mangla, K P Sharma, Rohit Kumar, 2022-04-24 *Cyber Physical Systems A Comprehensive Guide* explores the complete system perspective underlying theories modelling and the applications of Cyber Physical Systems CPS It aims to cover all topics ranging from discussion of rudiments of the system efficient management to recent research challenges and issues Editors aim to present the book in a self sufficient manner and to achieve this the book has been edited to include all the aspects of CPS The book focuses on the concept map of CPS including latest technological interventions issues challenges and the integration of CPS with IoT Big Data Analytics This aims to bring together unique contributions on cyber physical systems research and education with applications in industrial agriculture and medical domains The main aim of the book is to provide a roadmap to the latest advancements to provide optimal solutions in the field of CPS Features Coverage of rudiments of the subject Discussion of recent advancements in the associated field Considers an audience of diverse domains Suitable for students both UG and PG level and researchers in the field of CPS This book aims to present the emergence of Cyber Physical Systems in response to revolutionary advancements in IoT While

discussing the associated challenges it also endeavors to devise efficient models which are competent to address these challenges This book aims to cater to researchers and academicians working in the related field of CPS ELGAMAL CRYPTOSYSTEM KEY GENERATION, ENCRYPTION, DECRYPTION, AND DIGITAL SIGNATURES: LEARN BY EXAMPLES WITH PYTHON AND TKINTER Vivian Siahaan, Rismon Hasiholan Sianipar, 2024-09-01 This book presents an interactive Python application designed to showcase the ElGamal encryption algorithm through a user friendly Tkinter graphical user interface GUI At its heart the application focuses on the three core aspects of ElGamal cryptography key generation encryption and decryption Users can generate ElGamal keys of varying sizes by specifying the number of bits and view these keys in multiple formats including raw integers hexadecimal and Base64 encoding This flexibility facilitates seamless integration of the keys into different systems and applications making the tool invaluable for both educational purposes and practical implementations Additionally the application allows users to encrypt and decrypt data using the generated ElGamal keys providing a comprehensive demonstration of how this cryptographic scheme secures information The GUI simplifies the process of managing and visualizing encrypted and decrypted data helping users understand the effectiveness of ElGamal encryption in maintaining data confidentiality By combining these functionalities within an intuitive interface the project not only illustrates key cryptographic concepts but also offers a hands on approach to learning and applying ElGamal encryption in real world scenarios In chapter one we developed a project which aims to create an intuitive graphical user interface GUI for generating and displaying ElGamal encryption keys using the Tkinter library Users can specify the number of bits for key generation and view the keys in multiple formats including raw integers hexadecimal and Base64 encoding This flexibility ensures compatibility with various systems and applications making it easier for users to integrate and verify cryptographic keys The application features a tabbed interface that organizes the key generation process Users can enter the desired key size in one tab and generate the keys with a button click The keys are then displayed in separate tabs according to their format This structured approach simplifies the comparison and verification of keys in different representations enhancing the usability and effectiveness of the key management process In chapter two the fifth project integrates ElGamal encryption and decryption techniques into a user friendly application for securing sensitive data such as credit card numbers and transaction details The application generates synthetic datasets to demonstrate these cryptographic methods in action allowing users to create keys encrypt data and decrypt it to verify integrity and confidentiality Built with Tkinter the application provides an interactive experience with an intuitive graphical interface Users can specify key generation parameters generate synthetic transaction data and view the original encrypted and decrypted data through a series of tabs This design facilitates easy visualization of encryption and decryption effects making the application a practical tool for understanding and experimenting with cryptographic operations In chapter two the ninth project involves developing a Tkinter based GUI to demonstrate the ElGamal encryption algorithm using synthetic employee data The application provides an intuitive platform

for generating encrypting and decrypting data while also visualizing results through interactive graphs Users can manage data with multiple tabs for setup original encrypted and decrypted views and utilize matplotlib for visualizing data distributions and trends By integrating data management encryption and visualization the project offers a comprehensive tool for understanding and applying the ElGamal algorithm in a secure and user friendly manner In chapter three the fourth project is designed to process Bitcoin transactions using the ElGamal encryption scheme It features a comprehensive approach that includes generating encrypting decrypting and analyzing Bitcoin transaction data The core of the project is the integration of ElGamal encryption to ensure the confidentiality and integrity of transaction data demonstrated through a user friendly graphical interface The application utilizes Tkinter for the interface and Matplotlib for data visualization allowing users to interact with and analyze synthetic Bitcoin datasets It supports functionalities like encryption decryption and digital signature verification all while presenting data through intuitive visual graphs This combination of encryption and visualization provides a robust tool for secure transaction processing and analysis In chapter three the sixth project is designed to demonstrate the integration of cryptographic techniques with data visualization and management through a graphical user interface GUI built using Tkinter At its core the project utilizes the ElGamal cryptosystem a public key cryptographic algorithm known for its security in encryption and digital signatures The GUI enables users to interact with various functionalities of the ElGamal system including encryption decryption and signature verification all while managing and visualizing a synthetic dataset The ElGamal class encapsulates the core cryptographic functionalities providing methods for encrypting and decrypting messages as well as signing and verifying signatures It uses secure random number generation and hashing to ensure robust cryptographic operations To facilitate testing and demonstration the project includes a synthetic dataset generation function `generate_gov_dataset` which creates a mock dataset simulating government documents with attributes like document IDs classification levels departments and content This dataset allows users to apply cryptographic techniques to structured data providing a realistic scenario for data security operations The `process_dataset` function applies encryption and digital signatures to this synthetic dataset transforming it into an encrypted format with corresponding signatures for content verification The GUI implemented in the `ElGamalGUI` class serves as the primary interface featuring tabs for viewing original and encrypted data decrypted data signatures and distribution graphs These visualizations help users understand the impact of encryption on data characteristics and evaluate the effectiveness of the cryptographic methods Overall this project provides a comprehensive tool for exploring cryptographic techniques in a user friendly environment offering valuable insights into practical applications of encryption and digital signatures in data security
