

A sepia-toned portrait of a woman with short, dark, curly hair and glasses, smiling slightly. She is wearing a light-colored, possibly white, collared shirt. The background is a warm, golden-brown color. The title 'Unlocking THE GOLDEN CAGE' is overlaid on the top left of the portrait. 'Unlocking' is in a large, elegant, cursive script, while 'THE GOLDEN CAGE' is in a bold, green, sans-serif font.

Unlocking The Golden Cage An Intimate Biography Of Hilde Bruch M D:

Unlocking the Golden Cage Joanne Hatch Bruch, 1996 Hilde's story begins in a turn of the century German hamlet where she stood out as an exceptionally intelligent and intuitive child who watched skeptically as Kaiser Wilhelm's troops grandly marched off to World War I. Later as a young Jewish physician she experienced and fled the prejudice of the Third Reich to England and eventually New York escaping the terrible fate of numerous family members who died in Nazi concentration camps. She spent her own childbearing years as a pediatrician advising mothers while loving their children through it all remaining ironically outside the biological experience of motherhood. Blessed with a flawless memory, unshakable confidence and unflagging mental energy, Hilde was ruthlessly organized, mercilessly prepared and intimidatingly productive.

To Redeem One Person is to Redeem the World Gail A. Hornstein, 2021-05-04 A fascinating and dramatic account of a controversial figure in twentieth century psychiatry. In this dazzling and provocative biography, Gail Hornstein brings back to life the maverick psychiatrist Frieda Fromm Reichmann. *To Redeem One Person Is to Redeem the World* tells the extraordinary life story of the German Jewish refugee analyst who accomplished what Freud and almost everyone else thought impossible: she successfully treated schizophrenics and other seriously disturbed mental patients with intensive psychotherapy rather than medication, lobotomy or shock treatment. Written with unprecedented access to a rich archive of clinical materials and newly discovered records and documents from across Europe and the United States, Hornstein's meticulous and delightfully lucid biography definitively reclaims the life of Fromm Reichmann. The therapist at the core of Joanne Greenberg's *I Never Promised You a Rose Garden* is also the analyst who had an affair with and later married her patient, Erich Fromm. A pioneer in her field, she made history as the pivotal figure of the unique and legendary mental hospital, Chestnut Lodge. A lively, well-written account of a charismatic leader in an important period of psychiatry's history.

Psychology Today At a time when little pills are seen as a quick fix for almost everything, this book is well worth taking time to read and contemplate. *Philadelphia Inquirer*, *Publishers Weekly*, *Kirkus Reviews*.

The Mirror and the Mind Katja Guenther, 2022-11-08 How the classic mirror test served as a portal for scientists to explore questions of self-awareness. Since the late eighteenth century, scientists have placed subjects—humans, infants, animals, and robots—in front of mirrors in order to look for signs of self-recognition. Mirrors served as the possible means for answering the question: What makes us human? In *The Mirror and the Mind*, Katja Guenther traces the history of the mirror self-recognition test, exploring how researchers from a range of disciplines—psychoanalysis, psychiatry, developmental and animal psychology, cybernetics, anthropology, and neuroscience—came to read the peculiar behaviors elicited by mirrors. Investigating the ways mirrors could lead to both identification and misidentification, Guenther looks at how such experiments ultimately failed to determine human specificity. The mirror test was thrust into the limelight when Charles Darwin challenged the idea that language sets humans apart. Thereafter, the mirror, previously a recurrent if marginal scientific tool, became dominant in attempts to demarcate humans.

from other animals But because researchers could not rely on language to determine what their nonspeaking subjects were experiencing they had to come up with significant innovations including notation strategies testing protocols and the linking of scientific theories across disciplines From the robotic tortoises of Grey Walter and the mark test of Beulah Amsterdam and Gordon Gallup to anorexia research and mirror neurons the mirror test offers a window into the emergence of such fields as biology psychology psychiatry animal studies cognitive science and neuroscience The Mirror and the Mind offers an intriguing history of experiments in self awareness and the advancements of the human sciences across more than a century

The Anorexic Self Paula Saukko, 2008-05-08 Traditionally women's eating disorders are thought to be strongly influenced by media images idealizing a normative thin female body Taking a different approach The Anorexic Self critically examines diagnostic and popular discourses on anorexia that construct narrow and ideal notions of the female self Paula Saukko analyzes the personal and political implications of discourses on the anorexic self in multiple contexts including her own experience of being diagnosed anorexic psychiatrist Hilde Bruch's postwar research on anorexia and media coverage of Karen Carpenter Princess Diana and other women with eating disorders Saukko traces the history of the discourses from postwar idealization of masculine autonomy to postindustrial valorization of feminine flexibility and also explores their politically progressive and psychologically healing as well as sexist and humiliating dimensions Drawing on narrative therapy dialogic theory and multisited ethnography The Anorexic Self cultivates a less judgmental and more self reflexive way of relating to ourselves others and societies in which we live

Fat in the Fifties Nicolas Rasmussen, 2019-03-26 A riveting history of the rise and fall of the obesity epidemic during 1950s and 1960s America Metropolitan Life Insurance Company identified obesity as the leading cause of premature death in the United States in the 1930s but it wasn't until 1951 that the public health and medical communities finally recognized it as America's Number One Health Problem The reason for MetLife's interest They wanted their policyholders to live longer and continue paying their premiums Early postwar America responded to the obesity emergency but by the end of the 1960s the crisis waned and official rates of true obesity were reduced despite

the fact that Americans were growing no thinner What mid century factors and forces established obesity as a politically meaningful and culturally resonant problem in the first place And why did obesity fade from public and medical consciousness only a decade later Based on archival records of health leaders as well as medical and popular literature *Fat in the Fifties* is the first book to reconstruct the prewar origins emergence and surprising disappearance of obesity as a major public health problem Author Nicolas Rasmussen explores the postwar shifts that drew attention to obesity as well as the varied approaches to its treatment from thyroid hormones to psychoanalysis and weight loss groups Rasmussen argues that the US government was driven by the new Cold War and the fear of atomic annihilation to heightened anxieties about national fitness Informed by the latest psychiatric thinking which diagnosed obesity as the result of oral fixation just like alcoholism health professionals promoted a form of weight loss group therapy modeled on Alcoholics Anonymous The intervention caught on like wildfire in 1950s suburbia But the sense of crisis passed quickly partly due to cultural changes associated with the later 1960s and partly due to scientific research some of it sponsored by the sugar industry emphasizing particular dietary fats rather than calorie intake Through this riveting history of the rise and fall of the obesity epidemic readers gain an understanding of how the American public health system ambitious strong and second to none at the end of the Second World War was constrained a decade later to focus mainly on nagging individuals to change their lifestyle choices *Fat in the Fifties* is required reading for public health practitioners and researchers physicians historians of medicine and anyone concerned about weight and weight loss *Female, Jewish, and Educated* Harriet Pass Freidenreich, 2002-06-21 *Female Jewish and Educated* presents a collective biography of Jewish women who attended universities in Germany or Austria before the Nazi era To what extent could middle class Jewish women in the early decades of the 20th century combine family and careers What impact did anti-Semitism and gender discrimination have in shaping their personal and professional choices Harriet Freidenreich analyzes the lives of 460 Central European Jewish university women focusing on their family backgrounds university experiences professional careers and decisions about marriage and children She evaluates the role of discrimination and anti-Semitism in shaping the careers of academics physicians and lawyers in the four decades preceding World War II and assesses the effects of Nazism the Holocaust and emigration on the lives of a younger cohort of women The life stories of the women profiled reveal the courage character and resourcefulness with which they confronted challenges still faced by women today **Doing Research in Cultural Studies** Paula Saukko, 2003-11-03 Paula Saukko outlines the key methodological approaches to the study of lived experience texts and social contexts within the field of cultural studies **Weighty Issues** Jeffery Sobal, 2017-09-08 Many people consider their weight to be a personal problem when then does body weight become a social problem Until recently the major public concern was whether enough food was consistently available As food systems began to provide ample and stable amounts of food questions about food availability were replaced with concerns about ideal weights and appearance These interests were aggregated into public concerns

about defining people as too fat and too thin Social constructionist perspectives can contribute to the understanding of weight problems because they focus attention on how these problems are created maintained and promoted within various social environments While there is much objectivist research concerning weight problems few studies address the socially constructed aspects of fatness and thinness This book however draws from and contributes to social constructionist perspectives The chapters in this volume offer several perspectives that can be used to understand the way society deals with fatness and thinness The contributors consider historical foundations medical models gendered dimensions institutional components and collective perspectives These different perspectives illustrate the multifaceted nature of obesity and eating disorders providing examples of how a variety of social groups construct weight as a social problem **Notable American**

Women Susan Ware,2004 This latest volume brings the project up to date with entries on almost 500 women whose death dates fall between 1976 and 1999 You will find here stars of the golden ages of radio film dance and television scientists and scholars civil rights activists and religious leaders Native American craftspeople and world renowned artists For each subject the volume offers a biographical essay by a distinguished authority that integrates the woman s personal life with her professional achievements set in the context of larger historical developments Hunger Paul Robinson,Finn

Skårderud,Bente Sommerfeldt,2018-11-03 This work presents the adaptation of mentalization based therapy for use in Eating Disorders MBT ED The book starts with a presentation of the theoretical concept of mentalization and describes eating disorders from this perspective This is followed by a discussion of the place of MBT ED in eating disorders practice MBT is first presented as the original model for borderline personality disorder and then the model is further developed to address specific symptoms found in eating disorders such as body image disturbance restriction and purging The original MBT model consists of outpatient treatment combined with individual and group psychotherapy and psychoeducation in groups The book then looks at supervision and training and how an eating disorders team can develop a mentalizing focus It goes on to describe the training required for practitioners to deliver individual and group MBT ED and to supervise therapy Lastly it examines the implementation of the approach in different clinical settings including inpatient services and how management can be involved in negotiating barriers and taking advantage of enablers in the system The authors have conducted a pilot randomized controlled trial and qualitative research in MBT ED and have extensive experience in providing and supervising this novel therapy MBT ED is one of the few therapies for eating disorders that links theory of mind and attachment and psychodynamic therapies and as such will be of great theoretical interest to a wide variety of clinicians and researchers

Fatal Flaws Stuart C. Yudofsky,2007-04-02 Featuring case vignettes from nearly 30 years of Dr Yudofsky s clinical practice and incorporating the knowledge of gifted clinicians educators and research scientists with whom he has collaborated throughout that time Fatal Flaws Navigating Destructive Relationships With People With Disorders of Personality and Character uniquely captures the rapidly increasing body of clinical and research information about people

with severe and persistent personality and character disorders Within these pages the author brings to life the psychopathologies of personality and character disorders through vivid vignettes based on composites of his many patients and their most important relationships while meticulously changing the identifying facts and relevant details to protect confidentiality Covering the clinical course treatment genetics biology psychology and destructive consequences of hysterical histrionic narcissistic antisocial paranoid obsessive compulsive addictive borderline and schizotypal personality disorders Fatal Flaws stands out in the literature for these powerful reasons It is written for an unusually broad audience from mental health students and trainees of all disciplines to highly experienced clinicians to patients who suffer from or are in destructive relationships with people with personality disorders It is a hybrid part psychiatric textbook for clinicians and part self help manual for patients and clients with personality and character disorders It is designed to supplement treatment by providing patients with practical evidence based information about personality disorders and character flaws It is particularly valuable to patients who are in psychotherapy in part because they are entangled in destructive relationships with people with disorders of personality and or character It is written in the first person with the author directly communicating with a patient who either has a personality or character disorder or is in an important relationship with a person who has such a disorder It is useful for people who are uncertain whether they or their loved ones have personality or character disorders and who want to know more about these conditions and their treatments before making a decision about securing the help of a mental health professional Fatal Flaws Navigating Destructive Relationships With People With Disorders of Personality and Character is a compelling volume that provides the essential information and a realistic sense of the clinical experience required to inform orient and support novice mental health professionals and seasoned practitioners alike as they face the ongoing challenges of treating patients or clients with personality or character disorders It should also prove to be an invaluable resource for those who wish practical and effective help in understanding and changing their destructive relationships with people who have severe and persistent disorders of personality and or character
