Unthinking Social Science Limits Of 19th Century Paradigms:

Unthinking Social Science Immanuel Maurice Wallerstein, 2001 Immanuel Wallerstein develops a thorough going critique of the legacy of nineteenth century social science for social thought in the new millennium We have to unthink radically revise and discard many of the presumptions that still remain the foundation of dominant perspectives today Once considered liberating these notions are now barriers to a clear understanding of our social world They include for example ideas built into the concept of development In place of such a notion Wallerstein stresses transformations in time and space Geography and chronology should not be regarded as external influences upon social transformations but crucial to what such transformation actually is *Unthinking Social Science* applies the ideas thus elaborated to a variety of theoretical areas and historical problems

Structural Lie Charles C. Lemert, 2015-12-22 The *Structural Lie* tackles one of social science's most mysterious problems How is it possible to derive statements about the grand structures of social life from their effects in the small movements of everyday life Prominent sociologist Charles Lemert shows how Marx and Freud provide some answers to this question Marx derived from the commodity his picture of the capitalist system Freud diagnosed the character of psyches from the details of dreams slips and jokes This wonderfully readable and engaging book lays the foundation for a new social science in an age where a microchip can convey a world of information

Decolonial Politics in European Peripheries Sanja S. Petkovska, 2023-12-12 *Decolonial Politics in European Peripheries Redefining Progressiveness* Coloniality and Transition Efforts is a timely contribution to the project of theorizing Europe through decolonial perspectives on the Left as the European and global crisis has prompted new reflections on what it means to sit still at the European peripheries The book explores how the joint scholarship efforts of postcolonial and postsocialist scholars might come up with better grounded and more detailed theoretical and methodological insights into the process of globalization and subsequent peripheralization if framed under a progressive and leftist perspective The authors many from the South East Europe region use a variety of analytical lenses to demonstrate how the nexus of postcolonial postsocialist area studies and progressive developmental political thought could inspire changes in the future which are in dissonance with neoliberal and neoconservative capitalism As the side effects of global capitalism continue to accelerate scholars and activists in the postsocialist periphery are increasingly turning to the concept of decoloniality in the hope that it might offer more options on how to begin to build up their framework This book offers numerous examples of how decolonial theory can be applied to activist work in the fight against austerity and neoliberalization as well as examples of how decolonial critique can be mobilized to contest processes of Europeanization and Euro Atlantic integration This book will intrigue students and scholars of critical social scholarship in general as well as postsocialism and postcolonialism critiques of right populism and the rise of white nationalism in Europe and those studying the regions of South Eastern Europe and Eurasia more generally It will also interest activists organizers decision makers policy analysts and leftists both in the region and internationally
