Translation and Public Policy Gabriel González Núñez, Reine Meylaerts, 2017-04-21 This book brings together an ensemble of leading voices from the fields of economics language policy law political philosophy and translation studies They come together to provide theoretical perspectives and practical case studies regarding a shared concern translation policy Their timely perspectives and case studies allow for the problematizing and exploration of translation policy an area that is beginning to come to the attention of scholars This book offers the first truly interdisciplinary approach to an area of study that is still in its infancy It thus makes a timely and necessary contribution As the 21st century marches on authorities are more and more confronted with the reality of multilingual societies and the monolingual state policies of yesteryear seem unable to satisfy increasing demands for more just societies Precisely because of that language policies of necessity must include choices about the use or non use of translation at different levels Thus translation policy plays a prominent yet often unseen role in multilingual societies This role is shaped by tensions and compromises that bear on the distribution of resources choices about language legal imperatives and notions of justice This book aims to inform scholars and policy makers alike regarding these issues **Multimodal treatment of HPB cancer** Andrea Belli, Riccardo Memeo, 2023-08-21

Leadership for change W.P. Wahl, René Pelser, 2020-12-31 This edited volume reveals how the journey of transformation at the University of the Free State UFS became interwoven with student leadership development and global learning The UFS initiated two intersecting co curricular programmes namely the First Year Leadership for Change F1L4C programme in 2010 and the triennial Global Leadership Summit GLS in 2012 Although these programmes changed over time their core focus remained to be the development of transformational student leaders through the creation of global learning spaces From its inception in 2010 to the last GLS in 2018 the UFS global learning project involved 780 students and 259 staff members from 109 institutions across four continents The goal of this edited volume is to create a deeper understanding of how the UFS F1L4C and GLS programmes enhanced student leadership development through global learning especially in the context of higher education transformation **Pathways to Reform** Alexandra W. Logue, 2017-09-08 A personal account of the implementation of a controversial credit transfer program at the nation's third largest university Change is notoriously difficult in any large organization Institutions of higher education are no exception From 2010 to 2013 Alexandra Logue then chief academic officer of The City University of New York led a controversial reform initiative known as Pathways The program aimed to facilitate the transfer of credits among the university's nineteen constituent colleges in order to improve graduation rates a long recognized problem for public universities such as CUNY Hotly debated Pathways met with vociferous resistance from many faculty members drew the attention of local and national media and resulted in lengthy legal action In Pathways to Reform Logue the figure at the center of the maelstrom blends vivid personal narrative with an objective perspective to tell how this hard fought plan was successfully implemented at the third largest university in the

United States Logue vividly illustrates why change does or does not take place in higher education and the professional and personal tolls exacted Looking through the lens of the Pathways program and factoring in key players she analyzes how governance structures and conflicting interests along with other institutional factors impede change which Logue shows is all too rare slow and costly In this environment she argues it is shared governance combined with a strong central decision making authority that best facilitates necessary reform Logue presents a compelling investigation of not only transfer policy but also power dynamics and university leadership Shedding light on the inner workings of one of the most important public institutions in the nation Pathways to Reform provides the first full account of how despite opposition a complex higher education initiative was realized All net royalties received by the author from sales of this book will be donated to The City University of New York to support undergraduate student financial aid

Vaginal Dysbiosis and Biofilms, volume II António Machado, Claudio Foschi, Antonella Marangoni, 2025-04-01 It is well known that pregnancy outcomes and women's health can be impacted by and dependent on the resident vaginal microbiome The vaginal microbiome is constituted by a delicate and dynamic network of various microbes in different quantities and ratios Probiotic activity is expressed not only by individual Lactobacillus species but also by its multi microbial interaction However the probiotic activity promoted by multi microbial consortia is still unknown In addition other interactions between microorganisms and microbe host cells can either protect the vaginal epithelium or lead to different types of vaginal dysbiosis Furthermore biofilms represent the predominant mode of microbial growth in nature as well as infectious disease These complex microbial mediated and biofilm mediated interactions may also affect the course of the host immune system and the severity of the reproductive health outcomes in women leading to a public health problem
