represents diverse strands in museum activity from exhibitions to marketing as ethics is embedded in all areas of the museum sector What the contributions share is an understanding of the contingent nature of museum ethics in the twenty first century its relations with complex economic social political and technological forces and its fluid ever shifting sensibility The volume examines contemporary museum ethics through the prism of those disciplines and methods that have shaped it most It argues for a museum ethics discourse defined by social responsibility radical transparency and shared guardianship of heritage And it demonstrates the moral agency of museums the concept that museum ethics is more than the personal and professional ethics of individuals and concerns the capacity of institutions to generate self reflective and activist practice
