Urban Space in the Middle Ages and the Early Modern Age Albrecht Classen, 2009-12-15 Although the city as a central entity did not simply disappear with the Fall of the Roman Empire the development of urban space at least since the twelfth century played a major role in the history of medieval and early modern mentality within a social economic and religious framework Whereas some poets projected urban space as a new utopia others simply reflected the new significance of the urban environment as a stage where their characters operate very successfully As today the premodern city was the locus where different social groups and classes got together sometimes peacefully sometimes in hostile terms The historical development of the relationship between Christians and Jews for instance was deeply determined by the living conditions within a city By the late Middle Ages nobility and bourgeoisie began to intermingle within the urban space which set the stage for dramatic and far reaching changes in the social and economic make up of society Legal historical aspects also find as much consideration as practical questions concerning water supply and sewer systems Moreover the early modern city within the Ottoman and Middle Eastern world likewise finds consideration Finally as some contributors observe the urban space provided considerable opportunities for women to carve out a niche for themselves in economic terms

Travellers' Tales Roderick Neilsen,2009-01-14 Most of the research into ELT has focused on its linguistic and methodological aspects which are based on Western scientific traditions The contributions and experiences of English language teachers themselves especially their work in overseas contexts have frequently been overlooked This volume aims to document the complexity of ELT as work in new global economic and cultural conditions and to explore how this complexity is realised in the everyday experiences of ELT teachers The development of ELT from the colonial experience to

its current status as a global commodity is explored ELT is then situated in the discourses of globalisation specifically within Appadurai's theorisation of global flows of people images ideas technology and money or scapes Within this framework narratives are constructed from the experiences of Native speaking English teachers These reveal much about the personal pedagogical and cultural dimensions of ELT work in non Centre countries and will contribute to a greater understanding of the intercultural dimensions of ELT for all those who work in it and in related educational fields The Routledge Handbook of Urban Cultural Planning Rana Amirtahmasebi, Jason Schupbach, 2024-12-30 This book provides a manual for planning for arts and culture in cities featuring chapters and case studies from Africa the Americas Australasia the Middle East South and East Asia and more The handbook is organized around seven themes arts and planning for equity and social development incorporating culture in urban planning the intersection of creative and cultural industries and tourism planning financing public buildings public space and public art cultural heritage planning and culture and the climate crisis Urban planners are often tasked with preserving and attracting new art and culture to a city but there are no common rules on how practitioners accomplish this work This handbook will be an invaluable resource for city planners and designers cultural workers elected officials artists and social justice workers and advocates seeking to integrate creativity and culture into urban planning

Complexity, Cognition and the City Juval Portugali, 2011-07-06 Complexity Cognition and the City aims at a deeper understanding of urbanism while invoking on an equal footing the contributions both the hard and soft sciences have made and are still making when grappling with the many issues and facets of regional planning and dynamics In this work the author goes beyond merely seeing the city as a self organized emerging pattern of some collective interaction between many stylized urban agents he makes the crucial step of attributing cognition to his agents and thus raises for the first time the question on how to deal with a complex system composed of many interacting complex agents in clearly defined settings Accordingly the author eventually addresses issues of practical relevance for urban planners and decision makers The book unfolds its message in a largely nontechnical manner so as to provide a broad interdisciplinary readership with insights ideas and other stimuli to encourage further research with the twofold aim of further pushing back the boundaries of complexity science and emphasizing the all important interrelation of hard and soft sciences in recognizing the cognitive sciences as another necessary ingredient for meaningful urban studies **Multicultures and Cities** Gösta Arvastson, Tim Butler, 2006

In the planning of city development it is important that different groups should be able to live in peaceful coexistence This is how the concept multicultural came about During the 1970s multiculturalism was developed into a model of political democracy a strategy for society's rapid change The term multiculturalism suggests that contemporary urban cultures somehow co exist in a condition of mutual respect and possible equality The new multiculturalism seems very different from the migration that took place in the 1960s and 1970s The essays in this collection address the general themes of ethnicity and contemporary European urbanism in many different ways examining a wide variety of cities and city pairings The

common bond in these writings is the impact that a contemporary merging of ethnicity and culture is having on the new urbanity that is now widely accepted as driving the new Europe. The effect is far greater than might be predicted from the relative social powerlessness of many of the bearers of these cultures. At the same time existing urban processes continue to ensure the marginality of these groups.

African Urban Creativity Lauren England, Estrella Sendra, 2025-09-18. The edited collection *African Urban Creativity: Exploring Creative Economies Within and Beyond the Cities* seeks to contribute to understanding creative economies in Africa specifically the urban dynamics of creativity and the urbanisation of the creative economy. In doing so it also acknowledges the role of the periphery and rural settings within their inputs and dialogic relation to the city. The book contains six original contributions from academic researchers and creative practitioners bringing together a range of disciplinary perspectives and presenting case studies from across the continent: Ghana, Kenya, Nigeria, Senegal and South Africa. The book is structured in two parts. Part 1 explores different dynamics of urban culture, identities and local development opportunities. Part 2 focuses on the complex dialogue between cities and their peripheries or rural settings. The editors' conclusions reflect key themes of leadership, social and cultural development and urban-rural connectivity and present implications of policy and practice. This text provides readers with empirical insights from Africa that can lead to more research, debate and policy engagement on the sustainable development of creative economies in Africa. This edited collection launches the new book series *Routledge Focus on Creative Economies in Africa*.

Exploring Collaborative Urban Strategies Marisa Carmona, Marinda Schoonraad, 2004. The opening of the economy to external markets has brought about the reassessment of the significance of large spatial agglomerations and the accentuation of polarization at national scale. The dual movement of centralization and deconcentration processes inwards and outwards contributes to urban sprawl beyond the limits of metropolitan areas as has been demonstrated in Shanghai, Jakarta, Delta, Mexico City, Sao Paulo and Santiago. Its consequences for urban structure and urban morphology are immense and complex and it has fostered social fragmentation of space, changing location opportunities, land uses and centralities. The importance of transport and communication is accentuated; large intra and inter-urban connectivity are generated together with the generation of articulated networks, corridors, nodes with impact in land values. New lifestyles, new urban environments and new form of governance emerge and need to be theoretically and empirically underpinned.

Hidden Cities: Understanding Urban Popcultures Leonard Koos, 2020-05-18. The richly varied phenomenon of urban popcultures through distinctive practices and forms has significantly marked the life of modern city.
