Local Climate Action Planning Michael R. Boswell, Adrienne I. Greve, Tammy L. Seale, 2012-07-16 Climate change is a global problem but the problem begins locally Cities consume 75% of the world's energy and emit 80% of the world's greenhouse gases Changing the way we build and operate our cities can have major effects on greenhouse gas emissions Fortunately communities across the U.S. are responding to the climate change problem by making plans that assess their contribution to greenhouse gas emissions and specify actions they will take to reduce these emissions This is the first book designed to help planners municipal staff and officials citizens and others working at local levels to develop Climate Action Plans CAPs are strategic plans that establish policies and programs for mitigating a community's greenhouse gas (GHGs) emissions They typically focus on transportation energy use and solid waste and often differentiate between community wide actions and municipal agency actions CAPs are usually based on GHG emissions inventories which identify the sources of emissions from the community and quantify the amounts Additionally many CAPs include a section addressing adaptation how the community will respond to the impacts of climate change on the community such as increased flooding extended drought or sea level rise With examples drawn from actual plans *Local Climate Action Planning* guides preparers of CAPs through the entire plan development process identifying the key considerations and choices that must be made in order to assure that a plan is both workable and effective

Comparative Urban Land Use Planning Les Stein, 2017-09-25

Throughout the world city planners and governments grapple with the challenges of urban planning using remarkably similar land use regimes Yet the realisation is increasing that real urban problems crime decay drug abuse inequality depression and

alienation are not easily solved by the classic devices of a strategic plan and a zoning map Planning regimes are therefore in constant flux as planners and governments adjust and experiment to address these problems often with little awareness as to what they are trying to accomplish In *Comparative Urban Land Use Planning Best Practice* Leslie A Stein digs deeper drawing on examples from around the world to discover the best practice responses to the critical issues of planning and urban social problems Although every city has its own cultural and political milieu patterns of change and levels of success can be discerned and universal lessons learned By comparing different urban planning approaches and considering their underlying ideologies and assumptions he proposes a more insightful approach to the role of land use planning This book is both scholarly and emotional expressing a great love of cities and calling for a more clear eyed approach for their care
