E. M. Browning, Alessandro Rigolon, 2019-03-28 This book crosses disciplinary boundaries to investigate how the benefits of green spaces can be further incorporated in public health In this regard the book highlights how ecosystem services provided by green spaces affect multiple aspects of human health and well being offering a strategic way to conceptualize the topic For centuries scholars have observed the range of health benefits associated with exposure to nature As people continue to move to urban areas it is essential to include green spaces in cities to ensure sustained human health and well being Such insights can not only advance the science but also spark interdisciplinary research and help researchers creatively translate their findings into benefits for the public The book explores this topic in the context of big picture frameworks that enhance communication between the environmental public health and social sciences *Parks, Recreation, Open Space*, 1981 **Parks, Recreation, Open Space** Indianapolis (Ind.). Urban Design Section, 1981 Urban Green Peter Harnik, 2012-07-16 For years American urban parks fell into decay due to disinvestment but as cities began to rebound and evidence of the economic cultural and health benefits of parks grew investment in urban parks swelled The U S Conference of Mayors recently cited meeting the growing demand for parks and open space as one of the biggest challenges for urban leaders today It is now widely agreed that the U S needs an ambitious and creative plan to increase urban parklands Urban Green explores new and innovative ways for built out cities to add much needed parks Peter Harnik first explores the question of why urban parkland is needed and then looks at ways to determine how much is possible and where park investment should go When presenting the ideas and examples for parkland he also recommends political practices that help create parks The book offers many practical solutions from reusing the land under defunct factories to sharing schoolyards from building trails on abandoned tracks to planting community gardens from decking parks over highways to allowing more activities in cemeteries from eliminating parking lots to uncovering buried streams and more No strategy alone is perfect and each has its own set of realities But collectively they suggest a path toward making modern cities more beautiful more sociable more fun more ecologically sound and more successful *Park, Recreation, Open Space*
