Assessing Sustainability and Organizational Innovation of Urban Regeneration Projects Alessandra Ricciardelli, Nicola Raimo, 2022-12-10 This book offers the first comprehensive report on the topic of organizational innovation and sustainability of urban regeneration from the public manager's perspective. Starting from a rich set of case studies on urban regeneration from the region of Apulia in Italy, it develops a framework for measuring their sustainability performance. It proposes the use of indicators related to different aspects of the urban regeneration process, including the participations of stakeholders, land use and buildings, economy and jobs, transportation, environmental pollution, energy use, waste management, as well as open spaces and wildlife. This book offers extensive information to graduate students and researchers and to authorities, developers, investors, and stakeholders alike involved in the design, planning, and management and sustainable development of urban spaces. It is expected to foster a better understanding of the level of organizational innovation and sustainability of urban regeneration projects and the role of governing bodies in their implementation.

Future is Urban: Livability, Resilience & Resource Conservation Utpal Sharma, R. Parthasarathy, Dr. Aparna, 2023-05-26 Cities have played an important role in our lives since the dawn of civilization. However, cities are slowly becoming overwhelmed, and therefore, intervention is desirable towards green, blue, and egalitarian nature. Even with current urban issues, we must rise to the occasion as professionals to create cities that are social cities that take care of the environment and cities that are digital. Increased citizen participation is indispensable in this process. The International Conference on Future is Urban (IFCU 21 Dec 16-18 2021 Ahmedabad, India) takes into account Livability, Resilience, Resource Conservation for planning Future and cities in future. **Smart**

Transitions in City Regionalism Tassilo Herrschel, Yonn Dierwechter, 2018-03-22 In recent years, smartness has risen as a buzzword to characterize novel urban policy and development patterns. As a result of this debate around what smart actually means, both theoretically and empirically, have emerged within the interdisciplinary arenas of urban and regional studies. This book explores the changes in discourse, rationality, and selected responses of smartness through the theme of transition. The concept of transition provides the broader context and points of reference for adopting smartness in reconciling competing interests and agendas in city regional governance. Using case studies from around the world, including North America, Europe, and South Africa, the authors link external regime transition in societal values and goals with internal moves towards smartness. While reflecting the growing integration of overarching themes and analytical concerns, this volume further develops work on smartness, smart growth, transition, city regionalism, governance, and sustainability. **Smart Transitions in City Regionalism** explores how smart cities and city regions interact with conventional state structures. It will be of great interest to postgraduates and advanced undergraduates across urban studies, geography, sustainability studies, and political science.

Producing and living the high-rise: New contexts, old questions? Manoel Rodrigues Alves, Manuel Appert, Christian Montès, 2024-05-14 The purpose of the book is to assess the process of urban verticalization in different contexts through time to provide insight into the relationships between high-rise design and the way inhabitants negotiate them in their

everyday lives to assess how planners politicians and designers negotiate residential highrises in the strategies they develop for building the city and to introduce urban narratives and cartographies Verticalization although not new currently takes place in a very different context than post 1945 Today highrise residential buildings are more than architectural solutions they are commodities in a global market where capital flows are fixed by developers and municipalities Our exploration of residential verticalization is anchored in case studies revealing different types of local global negotiations in the design of the city and has been framed by three interrelated dynamics first the complex relationships within the financialization of real estate markets revealing differences in the types of local global negotiations in the construction of the neo liberal city secondly the most developed anchors residential verticalization in the processes of socio spatial differentiation within cities mostly identified as gentrification associated to processes of urban renewal and densification the third related to readings and interpretations of the urban landscape and social spatial practices and its iconographic and cartographic representations This book is of interest to academics students planners architects and urban studies professionals It shows that the chosen research object is an increasingly relevant angle of analysis of the contemporary city It also provides a better knowledge of the processes of residential verticalization their impact on the privatization of the urban space and on urban segregation or fragmentation
