Guns of the Special Forces, 2001-2015 Leigh Neville, 2016-03-31 An in depth look at the weaponry employed by Special Forces units around the world following the September 11th attacks In the years since 9 11 Special Forces of many nations have been in almost constant action in covert high risk operations around the globe These include the two long conflicts in Iraq and Afghanistan fighting nationalist insurgents and jihadist terrorists as well as other lesser known operations The weapons used by SF are a constant source of interest and speculation as are SF training methods and vehicles The armories of these elite units have developed rapidly to meet their demands and the ever more sophisticated threat They include for example suppressed piston driven carbines programmable grenade launchers that airburst behind hidden enemy and sniper rifles of extreme accuracy and range This highly researched book gives the reader a privileged insight into this secret world exploring the custom built weapons that operators carry on capture kill missions in the 21st Century Praise for Guns of Special Forces A cut above most of the books that purport to review special ops weapons Its limitation to the War on Terror years allows coverage of the many weapon developments that have taken place as special operations units have been constantly deployed and in action over the last decade and a half SWAT Magazine

Revitalising US-Russian Security Cooperation Richard Weitz,2020-11-25 Russia and the United States are the most important countries for many vital security issues They possess the world s largest nuclear weapons arsenals are involved in the principal regional conflicts and have lead roles in opposing international terrorism and weapons proliferation Despite persistent differences on many questions mutual interests consistently drive Russians and Americans to work together to overcome these impediments This Adelphi paper argues that opportunities for improving further security cooperation between Russia and the United States exist but are limited Near term results in the areas of formal arms control or ballistic missile defences are unlikely The two governments should focus on improving and expanding their joint threat reduction and nonproliferation programmes enhancing their military to military dialogue regarding Central Asia and defence industrial cooperation and deepening their antiterrorist cooperation both bilaterally and through NATO Using more market incentives expanding reciprocity and equal treatment and limiting the adverse repercussions from disputes over Iran would facilitate progress Russia and the United States will not soon become close allies but they should be able to achieve better security ties given that on most issues their shared interests outweigh those that divide them
