Lee, 2013-10-08 A volume on second language acquisition theory and pedagogy is at the same time a mark of progress and a bit of an anomaly The progress is shown by the fact that the two disciplines have established themselves as areas of study not only distinct from each other but also different from linguistic theory This was not always the case at least not in the United States The anomaly results from the fact that this book deals with the relationship between L2 theory and pedagogy despite the conclusion that there is currently no widely accepted theory of SLA Grouped into five sections the papers in this volume consider questions about L2 theory and pedagogy at the macro level from the standpoint of the L2 setting consider input in terms of factors which are internal to the learner examine the question of external factors affecting the input such as the issue of whether points of grammar can be explicitly taught deal with questions of certain complex linguistic behaviors and the various external and social variables that influence learners and discuss issues surrounding the teaching of pronunciation factors that affect a non native accent **Current Issues in Reading, Writing and Visual Literacy** Helene Christina

Environment Miranda Hamilton, 2013-04-11 Digitalised learning with its promise of autonomy enhanced learner choice independence and freedom is an intuitive and appealing construct but closer examination reveals it to be a rather simplistic proposition raising the following questions What do we mean by autonomy What are we implying about the role of the teacher the classroom and interaction between learners What do we understand about the impact of technology on the ecology of the learning environment This book describes the use of a Virtual Learning Environment VLE by a group of advanced English language learners in Mexico comparing what students thought and what they did in response to the technology The theoretical aim of the book is to work towards the construction of a theory of the development of autonomy and virtual learning in an EFL context Enhanced understanding about the relationship between autonomy and technology has the potential to inform academics software designers materials writers teacher educators and teachers and to help learners in their quest to acquire a foreign language **Usage-Based Approaches to Language Acquisition and Language Teaching**

Teaching Jacqueline Evers-Vermeul, Elena Tribushinina, 2017-03-06 Although usage based approaches have been successfully applied to the study of both first and second language acquisition to monolingual and bilingual development and to naturalistic and instructed settings it is not common to consider these different kinds of acquisition in tandem The present volume takes an integrative approach and shows that usage based theories provide a much needed unified framework for the study of first second and foreign language acquisition in monolingual and bilingual contexts The contributions target the acquisition of a wide range of linguistic phenomena and critically assess the applicability and explanatory power of the usage based paradigm The book also systematically examines a range of cognitive and linguistic factors involved in the process of language development and relates relevant findings to language teaching Finally this volume contributes to the assessment and refinement of empirical methods currently employed in usage based acquisition research This book is of interest to scholars of language acquisition language pedagogy developmental psychology as well as Cognitive Linguistics and Construction Grammar
