Application of Nanotechnology in Mining Processes Elvis Fosso-Kankeu, Martin Mkandawire, Bhekhe B. Mamba, 2022-01-31
Application of Nanotechnology in Mining Processes
Nanotechnology has revolutionized processes in many industries but its application in the mining industry has not been widely discussed. This unique book provides an overview of the successful implementation of nanotechnology in some of the key environmental and beneficiation mining processes. This book explores extensively the potential of nanotechnology to revolutionize the mining industry which has been relying for a very long on processes with limited efficiencies. The nine specialized chapters focus on applying nanoflotation to improve mineral processing, effective extraction of metals from leachates or pregnant solutions using nanoscale supramolecular hosts and development of nano adsorbents or nano based strategies for the remediation or valorization of AMD. The application of nanotechnology in mining has so far received little attention from the industry and researchers and this groundbreaking book features critical issues so far under reported in the literature. Application of nanotechnology in mineral processing for the enhancement of froth flotation. Development of smart nanomaterials and application for the treatment of acid mine drainage. Recovery of values from pregnant solutions using nano adsorbents. Valorization of AMD through formation of multipurpose nanoproducts.
Audience: Industrial interest will be from mining plant operators, environmental managers, water treatment plants managers and operators. Researchers in nanotechnology, environmental science, mining and metallurgy engineering will find the book valuable as will government entities such as regulatory bodies, officers and environmentalists.

Practices and Perspectives of Teaching and Teacher Education in Africa Boadu, Gideon, Odhiambo, George, Marandi, Pegah, 2023-09-25
Teacher education is a known variable that impacts the quality of teaching and schooling yet while research on practices in teaching and teacher education abound in other contexts there seems to be no comprehensive reference work on teaching and teacher education in Africa. With Africa and the diaspora boasting rich diverse political and educational contexts and practices this gap in knowledge requires that attention be focused on investigating issues that shape the pace, course and direction of teaching and teacher education in these contexts. Practices and Perspectives of Teaching and Teacher Education in Africa facilitates scholarly discussions among scholars and practitioners about practices, innovations and future possibilities for educating the next generation of competent students and teachers in Africa. Covering topics such as educational reforms, equity, career progression and curriculum development this major reference work is ideal for administrators, industry professionals, researchers, academicians, scholars, practitioners, instructors and students.
