University Of Venda Closing Dates For 2015:

Culture and Rural-Urban Revitalisation in South Africa Mziwoxolo Sirayi, Modimowabarwa Kanyane, Giulio Verdini, 2021-06-14 This book captures ground breaking attempts to utilise culture in territorial development and regeneration processes in the context of South Africa and our new normal brought by COVID 19 the fourth industrial revolution and climate change the world over The importance of culture in rural urban revitalisation has been underestimated in South Africa and the African continent at large Despite some cultural initiatives that are still at developmental stages in big cities such as Johannesburg eThekweni and Cape Town there is concern about the absence of sustainable policies and plans to support culture creativity and indigenous knowledge at national and municipal levels Showcasing alternative strategies for making culture central to development this book discusses opportunities to shift culture and indigenous knowledge from the peripheries and place them at the epicentre of sustainable development and the mainstream of cultural planning which can then be applied in the contexts of Africa and the Global South Governmental institutions research councils civil society organisations private sector and higher education institutions come together in a joint effort to explain the nexus between culture economic development rural urban linkages grassroots and technological innovations *Culture and Rural Urban Revitalization in South Africa* is an ideal read for those interested in rural and urban planning cultural policy indigenous knowledge and smart rural village model *Advanced Processes for Wastewater Treatment and Water Reuse* Rui C. Martins, Rosa M. Quinta-Ferreira, Maria Graca Rasteiro, Renato Falcão Dantas, Marta Gmurek, 2021-01-05 *Wheat Improvement, Management and Utilization* Ruth Wanyera, James Owuochi, 2017-05-24 The *Wheat Improvement Management and Utilization* book covers some of the most recent research areas that touch on enhancement of wheat productivity It is obvious that wheat is one of the major staple crops grown globally This crop has widely been researched on considering that for instance it is afflicted by various abiotic and biotic stresses that limit its growth and productivity Today's goal of wheat improvement consistently is to develop varieties that are high yielding with good processing and technological qualities well adapted and tolerant to prevailing biotic and abiotic stresses Therefore this is a valuable reference book on wheat improvement agronomy and end use qualities particularly for those who work in research organizations and higher academic institutions Moreover it provides an invaluable resource for readers interested in a quick review of trending topics in wheat *International Environments and Practices of Higher Education* Andrea Caputo, Deborah Lock, Dieu Hack-Polay, 2022-10-31 This book provides a critical review of the teaching practices in higher education in international contexts Sticky problems and debates about inclusivity diversity and cultural representation in the curriculum and classroom are explored through the eyes of the academics who negotiate complex teaching landscapes *Sewage* Ivan Zhu, 2018-07-25 Wastewater treatment and sludge disposal are important for protecting receiving rivers lakes and other water bodies and vital for human health Since excessive discharge may cause eutrophication and

deterioration of aquatic systems the US EPA and other national agencies have set guidelines for wastewater discharge standards Conventional technologies are well developed and widely applied worldwide for wastewater treatment however new ideas and new technologies are gaining additional interest for the sake of water and energy reuse While water is essential in arid regions wastewater reuse and recycling have been playing an important role in human life Although there are no universal standards for industrial and agriculture reuse balancing wastewater treatment and public health protection presents challenges and opportunities

Bedny, 2018-09-21 Systemic structural activity theory SSAT founded by Gregory Bedny is a relatively new unified framework for the study of efficiency of human performance equipment and software design This book presents new recently obtained data in the field of SSAT that can be used in the study of efficiency and complexity of human performance With increased cognitive demands to task performance psychological methods of study of human activity play an important role New principles and revised methods for the study of human work are supplemented by practical examples in manufacturing construction industry aviation and human computer interaction Features Presents new SSAT data Offers for the first time comparative analysis of studying efficiency and productivity from the perspective of ergonomics psychology and economics Includes examples of evaluation of economic efficiency of ergonomic innovations Provides advanced self regulative models of activity and of all cognitive processes that describe strategies of task performance Introduces a new efficient method of morphological and analytical quantitative analysis Discusses new methods of evaluation of complexity and reliability of highly variable computerized and computer based tasks Work Activity Studies Within the Framework of Ergonomics Psychology and Economics presents a comprehensive unified psychological theory that can be utilized as a general approach to the study of human activity not only for ergonomists and psychologists but also for economists that study the efficiency of human performance

Applications of STEM (Science, Technology, Engineering and Mathematics) Tools in Microbiology of Infectious Diseases Julio Alvarez, Andres Perez, 2017-06-02 Epidemiology is a discipline intended to systematically investigate and ideally quantify disease dynamics in populations Perez 2015 Epidemiological assessments may be divided into four large areas namely a identification and characterization of a pathogen b development of systems for detection of cases c descriptive epidemiology and quantification of disease patterns and d advanced analytical methods to design intervention strategies Briefly there is an initial need for understanding the pathogeny of a disease and condition which may also include experimental studies and development of new models of infection and proliferation under different conditions Subsequently such knowledgemay be applied to support the identification of cases which typically includes the design evaluation and validation of diagnostic tests Diseasemay then be quantified in a population leading to the identification of patterns and application of molecular characterization techniques to understand disease spread and ultimately to identify factors preventing or promoting disease Finally those factors may be incorporated into advanced quantitative methods and epidemiological models which are used to design and evaluate strategies aimed at preventing controlling or eliminating disease in the population Recent years have seen a

dramatic increase in the application of science technology engineering and mathematical STEM tools and approaches intended to enhance such analytical epidemiology process with the ultimate goal of supporting disease prevention control and eradication This eBook comprises a series of research articles that through current state of the art scientific knowledge on the application of STEM tools to the microbiology of infectious diseases demonstrate their usefulness at the various components of an integral epidemiological approach divided into the four large components of a experimental studies b novel diagnostic techniques c epidemiological characterization and d population modeling and intervention **Engineering**
