Students Enrolled for Advanced Degrees National Center for Educational Statistics, 1971 Based on the Office of Education s Annual survey of enrollment for advanced degrees **James Joyce's 'Work in Progress'** Dirk Van Hulle, 2016-04-28 The text of Finnegans Wake is not as monolithic as it might seem It grew out of a set of short vignettes sections and fragments Several of these sections which James Joyce confidently claimed would fuse of themselves are still recognizable in the text of Finnegans Wake And while they are undeniably integrated very skillfully they also function separately In this publication history Dirk Van Hulle examines the interaction between the private composition process and the public life of Joyce s Work in Progress from the creation of the separate sections through their publication in periodicals and as separately published sections Van Hulle highlights the beautifully crafted editions published by fine arts presses and Joyce s encouragement of his daughter s creative talents even as his own creative process was slowing down in the 1930s All of these pre book publications were alive in both bibliographic and textual terms as Joyce continually changed the texts in order to prepare the book publication of Finnegans Wake Van Hulle s book offers a fresh perspective on these texts showing that they are not just preparatory versions of Finnegans Wake but a Work in Progress in their own right

Students who participate in scientific research as undergraduates report gaining many benefits from the experience However undergraduate research done independently under a faculty member's guidance or as part of an internship regardless of its individual benefits is inherently limited in its overall impact Faculty members and sponsoring companies have limited time and funding to support undergraduate researchers and most institutions have available or have allocated only enough human and financial resources to involve a small fraction of their undergraduates in such experiences Many more students can be involved as undergraduate researchers if they do scientific research either collectively or individually as part of a regularly scheduled course Course based research experiences have been shown to provide students with many of the same benefits acquired from a mentored summer research experience assuming that sufficient class time is invested and several different potential advantages In order to further explore this issue the Division on Earth and Life Studies and the Division of Behavioral and Social Sciences and Education organized a convocation meant to examine the efficacy of engaging large numbers of undergraduate students who are enrolled in traditional academic year courses in the life and related sciences in original research civic engagement around scientific issues and or intensive study of research methods and scientific publications at both two and four year colleges and universities Participants explored the benefits and costs of offering students such experiences and the ways that such efforts may both influence and be influenced by issues such as institutional governance available resources and professional expectations of faculty *Integrating Discovery Based Research into the Undergraduate Curriculum* summarizes the presentations and discussions from this event
