Unthinking Thinking Jorge Luis Borges Mathematics And The New Physics:

Unthinking Thinking Floyd Merrell, 1991 This authoritative study explores the scientific and mathematical cultural milieu that patterns much of the Argentine writer Jorge Luis Borges's narrative design Although criticism of Borges's fiction and essays has long emphasized philosophical traditions Merrell expands the context of this interrogation of traditions by revealing how early twentieth century and contemporary mathematics and physics also participated in a similar exploration Topics treated include the semiotic flows of paradox and contradiction the patterns of infinities the limits of natural and mathematical languages and the narrative function in scientific theory Against this background Merrell provides incisive readings of Borges's complex fiction and essays *Jorge Luis Borges, Post-Analytic Philosophy, and Representation* Silvia G. Dapía, 2015-08-20 Making an important contribution to studies in Literature and Philosophy this book reads Jorge Luis Borges philosophically particularly in reference to his use of representation and reality Rather than attempting to subordinate Borges to a set of philosophical constructs to reduce Borges texts to mere exemplifications or illustrations of philosophical theories the book uses Borges's short stories to demonstrate how philosophical questions related to representation develop out of literature and actually serve as precursors to the various strains of post analytic philosophy that later developed in the United States The volume discusses American post analytic philosophers Richard Rorty Hilary Putnam Donald Davidson Nelson Goodman and Arthur Danto as well as a wide ranging set of philosophical ideas including reflections on Keynes Hayek Schopenhauer and many others Chapters offer detailed readings of Borges texts extending from 1939 to 1983 locating where he thematizes issues of representation and pursuing the logic of Borges's text toward its philosophical implications without neglecting their literary value The book argues that Borges exploration of the relationship between representation and reality places him unmistakably in the position of a precursor to the post analytic philosophers Illuminating the role that language plays in the creation of reality and representation this volume makes significant contributions not only to Borges scholarship but also post structuralism post analytic studies of language semiotics comparative literature and Latin American literature *A Study Guide for Jorge Luis Borges's "The Aleph"* Gale, Cengage Learning, 2016 A Study Guide for Jorge Luis Borges's *The Aleph* excerpted from Gale's acclaimed *Short Stories for Students* This concise study guide includes plot summary character analysis author biography study questions historical context suggestions for further reading and much more For any literature project trust *Short Stories for Students* for all of your research needs **The Cambridge Companion to Jorge Luis Borges** Edwin Williamson, 2013-12-05 A comprehensive account of Borges's life and work including his early and late poetry and his hugely influential short stories **The Unimaginable Mathematics of Borges' Library of Babel** William Goldbloom Bloch, 2008-08-25 William Goldbloom Bloch takes readers on a fascinating tour of the mathematical ideas hidden within one of the classic works of modern literature Written in the vein of Douglas R Hofstadter's Pulitzer Prize winning *Gödel Escher Bach* this original and

imaginative book sheds light on one of Borges most complex richly layered works Given Borges well known affection for mathematics this exploration of the story through the eyes of a humanistic mathematician makes a unique and important contribution to the body of Borgesian criticism

Borges and Kafka Sarah Rachelle Roger,2017 Sarah Roger investigates Jorge Luis Borges s development as an author in light of Franz Kafka s influence and in consideration of Borges s relationship with his father a failed author She explores how reading Kafka helped Borges mediate and make productive use of his own relationship with his father

Heterosexual Masculinities and the Self-Reflexive Novel Stefano Rossoni,2025-07-24 Heterosexual Masculinities and the Self Reflexive Novel examines how the narratives of four world renowned authors namely J M Coetzee Milan Kundera Philip Roth and Mario Vargas Llosa offer a standpoint through which to address the inscription of heterosexual masculinity into Western literary legacy and the ways in which masculinity is re fashioned in contemporary self reflexive novels Considering the interconnectedness of their narratives for the first time the book explores unexamined patterns of dialogue among Coetzee Kundera Roth and Vargas Llosa while also contextualising their writing in the light of the European literary tradition inaugurated by Cervantes s Don Quixote and continued by Flaubert s Madame Bovary Rather than building on conventional theoretical approaches to literary studies Stefano Rossoni develops a fresh and engaging approach by looking at these two works not only as narrative texts but most importantly as theories of literature In dialogue with critical contributions that examined men s emotional illiteracy and struggle to develop a language for self reflection the book argues that the narratives of Coetzee Kundera Roth and Vargas Llosa engage with the tradition of the self reflexive novel and its ramifications to reflect on masculinity as a socio cultural construction Ultimately their writing reveals men s novelistic self reflexivity as a site of unintelligibility

China's Rise and Rethinking International Relations Theory Chengxin Pan,Emilian Kavalski,2022-02-16 Bringing together leading scholars from Asia and the West this book investigates how the dynamics of China s rise in world politics contributes to theory building in International Relations IR The book demonstrates how the complex and transformative nature of China s advancement is also a point of departure for theoretical innovation and reflection in IR more broadly In doing so the volume builds a strong case for a genuinely global and post Western IR It contends that non Western countries should not only be considered potential sources of knowledge production but also original and legitimate focuses of IR theorizing in their own right

Complementing Latin American Borders Floyd Merrell,2005-10-30 The idea of complementing borders is appropriately ambiguous with respect to Latin America People inhabiting cultural borders do not belong to either of the two sides yet they are contained within the complementation

that emerges when two or more cultures interdependently and incongruously interact In giving an account of complementing borders this volume alludes to the Latin American context most particularly Brazil and Mexico through notions of rhythms and resonances euphonies and discords continuous flows and syncope all of which are found in everyday life the arts politics economics and social institutions and practices The general theme of *Complementing Latin American Borders* emerging from Charles S Peirce's process philosophy is that of ebb and flow fusion and diffusion ordering and disordering and the intermixing and dispersal of propensities and proclivities among Latin American cultures past and present The story begins with a dialogue in the form of a satirical play on various characters of Jorge Luis Borges Latin American is then presented in terms of invention and perpetual re-invention As such Latin America as sympathetic vibrations creating cultural patterning brings about notions of vagueness within generality by way of homogenizing and heterogenizing tendencies within hegemonizing pressures The reader comes away with a renewed sense of Latin American border complementing

Literary Cynics Arthur Rose, 2017-04-06 Focusing on work by Jorge Luis Borges Samuel Beckett and J M Coetzee *Literary Cynics* explores the relationship between literature and cynicism to consider what happens when authors write themselves into their art against the rhetoric of authority Rose takes as his starting point three moments of aesthetic crisis in the careers of these literary cynics Borges's parables of the 1950s Beckett's plays of the 1980s and Coetzee's pedagogic novels of the 2000s In their transition to late style the works reflect their writers' abiding concern with particular conceptions of rhetoric and aesthetic form *Literary Cynics* combines accounts of these late works with classic lesser known and archival texts by the three writers from Coetzee's *Disgrace* to Beckett's letters as well as detailed analysis of cynicism both ancient and modern as a philosophical and political movement

"Science, Technology, and Utopias" Christine Filippone, 2017-07-05 The rise of proxy wars the Space Race and cybernetics during the Cold War marked science and technology as vital sites of social and political power Women artists historically excluded from these domains responded critically while simultaneously redeploying the products of Technological Society into works that promoted ideals of progress and alternative concepts of human community In this innovative book author Christine Filippone offers the first focused examination of the conceptual use of science and technology by women artists during and just after the women's movement She argues that artists Alice Aycock Agnes Denes Martha Rosler and Carolee Schneemann used science and technology to mount a critique on Cold War American society as they saw it conservative and constricting Motivated by the contemporary American Women's Movement these artists transformed science and technology into new modes of artmaking that transgressed modernist heroic painterly styles and subverted the traditional economic structures of the gallery the museum and the dealer At the same time the artists also embraced these domains of knowledge and practice as expressions of hope for a better future Many found inspiration in the scientific theory of open systems which investigated problems of wholeness dynamic interaction and organization enabling consideration of the porous boundaries between human bodies and their social political and nonhuman

environments Filippone also establishes that the theory of open systems not only informed feminist art but also continued to influence women artists practice of reclamation and ecological art through the twenty first century *Semiosis in the Postmodern Age* Floyd Merrell,1995 Who are we to suppose we are capable of comprehending the world of which we are a part and what is the world to suppose it can be understood by us minuscule and insignificant spatiotemporal warps contained within it This provocative question opens Floyd Merrell s study of postmodernism and the thought of Charles Sanders Peirce part of the author s ongoing effort to understand our contemporary cultural and intellectual environment The specific focus in this interdisciplinary study is the modernism postmodernism dichotomy and Peirce s precocious realization that the world does not lend itself to the simplistic binarism of modernist thought In Merrell s examination of postmodern phenomena the reader is taken through various facets of the cognitive sciences philosophy of science mathematics and literary theory Merrell s consideration of Peirce s complex and inadequately understood concept of the sign is enhanced through numerous charts and figures Theories hypotheses and speculation in the physical sciences are then brought to bear on Peircean semiotics The final chapter critiques the often indiscriminating acceptance of postmodern practices in today s academic world *Literature in Dialogue with the Natural Sciences* Christoph Strosetzki,2025-09-15 The thesis of the book is that in the early modern period literature claimed precedence over the observation of nature There were shifts through phases of temporary parity the priority of natural sciences in the 19th century and their critique by literature in the 20th century These developments are presented in France and the Spanish speaking world while also considering Germany and England While Montaigne Pedro Mex a P rez de Oliva Vives and Graci n prioritize literature Pascal contrasts the esprit de finesse with the esprit de g om trie opening a controversy that Linnaeus and Buffon continue Enlightenment thinkers like Voltaire orient themselves toward the English model where Locke and Hume introduce empirical sciences whose advances Rousseau critiques In the 19th century Balzac and P rez Gald s engage with the natural sciences with Zola later looking to Darwin and Comte as role models Finally the aporias of scientific thinking are highlighted by Ortega y Gasset Borges and S bato

Circular Narratives in Modern European Literature Juan Luis Toribio Vazquez,2022-06-16 Breaking with linearity the ruling narrative model in the Jewish Christian tradition since the ancient world many 20th century European writers adopted circular narrative forms Juan Luis Toribio Vazquez shows this trend was not a unified nor conscious movement but rather a series of works arising sporadically in different countries at different times using a variety of circular structures to express similar concerns and ideas about the world This study also shows how the renewed understanding of narrative form leading to this circular trend was anticipated by Nietzsche s critiques of truth knowledge language and metaphysics and especially by his related discussions of nihilism and the eternal recurrence Starting with an analysis of the theory and genealogy of linear narrative the author charts the emergence of Nietzsche s idea of eternal return before then turning to the history of the circular narrative trend This history is explored from its inception in the works of August Strindberg Gertrude Stein and

Azor n through its development in the interwar years by writers such as Raymond Queneau and Vladimir Nabokov to its full flowering in the work of authors James Joyce or Samuel Beckett among others and its later employment by post war writers including Alain Robbe Grillet Italo Calvino and Maurice Blanchot Through a series of close readings the book aims to highlight the various ways in which narrative circularity serves to break with an essentially teleological and theological thinking Finally Toribio Vazquez concludes by proposing a new typology of non linear narratives which builds on the work of recent narratologists

Test Tube Envy J. Andrew Brown, 2005 The scientific disciplines considered range from nineteenth century phrenology and ethnography to twentieth century chemistry quantum mechanics cybernetics and chaos theory In so doing Brown critically engages the work of Foucault and other social and philosophical theorists as he examines the ways in which scientific prestige is manufactured and appropriated on the literary stage Jacket

Memory in Literature S. Nalbantian, 2002-11-15 This book is the first to discover and probe in depth memory phenomena captured in literary works Using literature as a laboratory for the workings of the mind this comparative study of writers from Jean Jacques Rousseau to Octavio Paz including Proust Breton Woolf and Faulkner uncovers valuable material for the classification of the memory process Nalbantian's daring interdisciplinary work involving literature science and art forges a new model for dialogue between the disciplines

New Directions in the Philosophy of Mathematics Thomas Tymoczko, 1998-02 The traditional debate among philosophers of mathematics is whether there is an external mathematical reality something out there to be discovered or whether mathematics is the product of the human mind This provocative book now available in a revised and expanded paperback edition goes beyond foundationalist questions to offer what has been called a postmodern assessment of the philosophy of mathematics one that addresses issues of theoretical importance in terms of mathematical experience By bringing together essays of leading philosophers mathematicians logicians and computer scientists Thomas Tymoczko reveals an evolving effort to account for the nature of mathematics in relation to other human activities These accounts include such topics as the history of mathematics as a field of study predictions about how computers will influence the future organization of mathematics and what processes a proof undergoes before it reaches publishable form This expanded edition now contains essays by Penelope Maddy Michael D Resnik and William P Thurston that address the nature of mathematical proofs The editor has provided a new afterword and a supplemental bibliography of recent work

Later Middle English Literature, Materiality, and Culture Brian Gastle, Erick Kelemen, 2018-04-12 The essays in this volume consider the ways in which material and intellectual culture both shaped and were shaped by the literature of late medieval England The first section Textual Material reflects on cultural and social issues generally referred to as the History of Ideas and how those ideas manifest in later medieval English texts Essays address for example affect in The Book of Margery Kempe rhetoric in Sir Gawain and the Green Knight anarchy in late medieval political texts and temporality in Gower's Confessio Amantis The essays in the second section Material Texts examine physical objects from pilgrim badges to manuscripts to money to early

printed editions and the cultural behaviors associated with them interpreting these objects and exploring their connections to the important literary and political texts of the age such as Piers Plowman Lydgate's Troy Book and Chaucer's Canterbury Tales All of the essays in this collection emerge from the relationships and connections between the issues that characterize Jim Dean's work the cultural material and aesthetic aspects of later medieval English literature So too do they reflect a movement in medieval literary studies presaged by Dean's career of scholarship and teaching that critical approaches to literary texts are best undertaken with an understanding of the complex cultural and historical milieu that defines both the production of those texts and the production of our own work on those texts *Building Bridges between Cultures in Ian McDonald's Science Fiction* Jerome Winter, 2025-09-18 This book is a career long retrospective of the Irish writer Ian McDonald and his complex compelling representation of our contemporary global condition Ian McDonald is a celebrated writer within the science fiction community whose rich and urgent body of works span over a quarter of a century The author claims McDonald's work functions as vital troubling allegories which both refuse the Orientalist euphemizing of colonial atrocities while still at the same time envisioning a transformative global alterity seeking an ethical and political embrace of systematically silenced subaltern voices in the neoliberal world system The book follows McDonald as the globe trotting writer travels from Ireland to Kenya to India to Brazil to Turkey to a proliferating multiverse and beyond Along the way the author analyzes McDonald's science fiction as a salient contribution to the flourishing cosmopolitan literature of postcolonial developing nations at the crossroads of the global imaginary
