US Heavy Cruisers 1941-45 Pre War Classes New Vanguard:

US Heavy Cruisers 1941-45 Mark Stille, 2014-04-20 Designed and produced under the regulations of the Washington Naval Treaty the heavy cruisers of the Pensacola Northampton Portland New Orleans and Wichita classes were exercises in compromise While they possessed very heavy armament the Pensacolas for example carrying a main battery of ten 8 guns this came at the cost of protection armor was the same thickness as a gun cruiser and incapable of protecting the vessels from enemy 8 fire As the classes evolved these flaws began to be corrected with the main battery being reduced and increased protection being added to the vital areas of the ship Despite these drawbacks the pre war heavy cruiser classes served with distinction throughout World War II *Imperial Japanese Navy Heavy Cruisers 1941-45* Mark Stille, 2012-05-20 Designed with little more than a passing nod to the international naval treaties of the inter war period the Imperial Japanese Navy's heavy cruisers were fast and heavily armed Like the other vessels of the Japanese Navy the heavy cruisers were technologically superior to and far more innovative than their Allied rivals whom they met in many of the major Pacific Theatre battles including Midway and Leyte Gulf Mark Stille continues his study of the IJN of WWII with this fascinating topic addressing the design and development of all 18 ships in the six heavy cruiser classes from pre war construction and mid war alterations to their operational histories and eventual fates *German Heavy Cruisers 1939-45* Gordon Williamson, 2012-04-20 The development of this excellent and successful class of warship only became possible after the Anglo German naval agreement of 1935 eased restrictions on the types of ship Germany could build Even then only five of the class were permitted the Admiral Hipper the Blücher the Prinz Eugen the Seydlitz and the Lützow These Cruisers were designed for Atlantic operations and had eight 8 inch guns 12 10 5 cm heavy anti aircraft guns and 17 smaller calibre anti aircraft guns as well as twelve torpedo tubes and their own complement of up to six aircraft This title covers the design development and operational history of the Heavy Cruisers of the Admiral Hipper class **US Navy Light Cruisers 1941-45** Mark Stille, 2016-07-28 During World War II the United States built 72 light cruisers of various classes In response to the severe air threat that surface ships faced new cruisers were designed with increasingly heavy anti aircraft weaponry as well as the traditional 6 inch guns With the speed and range to keep up with aircraft carriers and their considerable anti aircraft capability they were a mainstay of the carrier escorts This book examines every US light cruiser produced including those of the Fargo and Worcester classes which were actually complete after World War II had ended tracing their design development and evolution throughout the war and beyond *Imperial Japanese Navy Light Cruisers 1941-45* Mark Stille, 2012-02-20 The Imperial Japanese Navy went to war with 17 light cruisers and another three cruiser sized training ships Of these most were 5 500 ton ships designed to act as destroyer squadron flagships This made them much different in capabilities and mission from their American counterparts During the war the Japanese built another five light cruisers all but one of which maintained the design premise of being able to serve as destroyer squadron flagships During the war

Japanese light cruisers were active throughout the Pacific performing many missions in addition to their flagship duties Mark Stille continues Osprey's coverage of the IJN of WWII with this concise and complete study of all 25 ships from their design and development to their ultimate fates Detailed artwork and rare period photographs from the Fukui collection held in Kure Japan illustrate this discussion **US Standard-type Battleships 1941-45 (2)** Mark Stille,2015-12-20 This book

completes an authoritative two part study on the Standard type US battleships of World War II ships that were designed to fight a different type of war than the one that unfolded It gives precise technical details of the design history and features of the Tennessee Colorado and the unfinished South Dakota and Lexington classes whilst providing an operational history of the former two Written by a leading expert on the US Navy in World War II and augmented by contemporary photographs and specially commissioned illustrations this is the other half of the story of the US Standard type battleships from the terrible damage they sustained at Pearl Harbor to their support of the war winning landings of the US Marine Corps and US Army

with new armaments and a great improvement on earlier designs Between 1892 when the first destroyers were laid down and 1918 destroyers evolved radically from 27 knot 250 ton ships into 35 knot 1 530 ton ships All these ships were involved in some form during World War I the smaller original destroyers in an auxiliary support role and the newer larger destroyers at some of the greatest sea battles of the war This account highlights the role the destroyers played in the North Sea during the crucial battles to control the Heligoland Bight as well as the major fleet action at the battle of Jutland in 1916 Complete with a detailed description of the technical evolution of each class of destroyer from the 27 knotters to the Tribal and Marksman classes Jim Crossley offers a complete overview of the vessels that helped to maintain Britain's naval supremacy

Sherman Crab Flail Tank David Fletcher, 2012-05-20 The Sherman Crab Flail tank was the powerful culmination of a series of mine clearing flail tanks developed during World War II Here David Fletcher recounts how the Sherman Crabs were among the first tanks ashore on D Day and as the war progressed they were in constant demand both for formal attacks and more incidental operations Following the development of the tank and its use in the war he details the US Army's initial lack of interest in the flail but how after cooperative actions with the British they too decided to adopt the type themselves In addition to its special mine clearing role the Sherman Crab was also capable of fighting in tank duels and this book includes dramatic accounts of its use by the famous 79th Armoured Division and the US Army The book explores the beginnings of the design in the Matilda Scorpion and Baron flails developed for the Valentine and M3 Grant tanks through to the Sherman and particularly the Crab version This detailed account of one of the most interesting tanks in the Funnies series is a delight for any modeller or tank enthusiast

Commonwealth Cruisers 1939-45 Angus Konstam, 2015-10-20 In the early 20th century Britain's largest colonies established their own small naval presence and their ships fought alongside the Royal Navy during World War I These fleets were expanded during the inter war years and in 1939 the Royal Australian Navy the Royal Canadian Navy and the Royal New Zealand Navy willingly joined the fight on behalf of the British Commonwealth For the most part these small navies consisted of a few cruisers and destroyers designed to protect territorial waters and local sea lanes However these warships and their crews soon found themselves involved in a global war and consequently were called upon to fight wherever they were needed against the Germans the Italians and the Japanese This book tells the story of these small cruiser forces and the men who served the Allied cause so well during the long and brutal war at sea

German Pocket Battleships 1939-45 Gordon

Williamson,2012-04-20 After the end of World War I the German Navy came up with the concept of the Panzerschiffe or Pocket Battleship to circumvent treaty limitations on the size and types of ship Germany was permitted to build New more modern production methods where welded construction prevailed over the older riveting process were combined with the development of modern engines capable of fast speeds and a very powerful armament far superior to that on any enemy Cruisers This book covers these three sister ships the Deutschland the Admiral Graf Spee and the Admiral Scheer which formed the core of the Kriegsmarine s fighting power at the start of World War II [Kriegsmarine U-boats 1939-45 \(2\)](#)

Gordon Williamson,2012-04-20 Following on from New Vanguard 51 Kriegsmarine U boats 1939 45 1 this book charts the continuing development of the U boat in German service including the evolution of the Type IX as a long range cruiser intended for solo operations in distant waters Also covered is the revolutionary Type XXI conceived of in 1942 and launched in April 1944 the first true submarine rather than submersible whose arrival was just too late to influence the war Other vessels covered are the Type XXIII a small vessel armed with only two torpedoes but technically highly advanced and the Type X minelayers which were rarely used in their intended role and more often used as supply boats **Great Lakes**

Warships 1812-1815 Mark Lardas,2012-03-20 When war broke out in 1812 neither the United States Navy nor the Royal Navy had more than a token force on the Great Lakes However once the shooting started it sparked a ship building arms race that continued throughout the war Mark Lardas examines the design and development of the warships built upon the lakes during the war emphasising their differences from their salt water contemporaries Alongside illustrations he explains their operational use as they were pitted against each other in a number of clashes on the lakes that often saw ships captured re crewed and thrown back against their previous owners Released in 2012 to coincide with the 200th anniversary of the outbreak of the war this is a timely look at a small freshwater naval war **Kriegsmarine Coastal Forces** Gordon

Williamson,2012-06-20 Although often overlooked in favour of the U boats or battleships the vast majority of the Kriegsmarine was formed of the smaller vessels of the coastal forces These ships and boats which included minesweepers torpedo boats patrol boats and blockade breakers gave crucial service to Germany during the war and many continued serving for decades after the surrender in such tasks as clearing minefields Also included in these forces was Hitler s yacht the Ostwind This book reveals the history of the vessels that formed the backbone of the Kriegsmarine and combines fascinating anecdotes detailed technical information and full colour artwork *Ships of the American Revolutionary Navy*

Mark Lardas,2012-01-20 Mark Lardas explores the origins of American warships primarily light and medium frigates built for the Continental Navy during the years 1776 1783 This was the first navy of the United States and much of the fleet was comprised of ships that had been modified from existing vessels converted into warships to provide a crucial service during the American Revolutionary War Despite having no real funding this unique fleet had a surprising amount of success against the might of the Royal Navy and this title discusses the strengths and weaknesses of each design and the differences

between European and American warships of the time With a close look at how these ships performed in key battles as well as the exploits of John Paul Jones the founding father of the United States Navy this is a complete illustrated overview of the ships service and development until France's entry into the war and the subsequent decline in importance of the Continental Navy

US Navy Aircraft Carriers 1922-45 Mark Stille, 2012-05-20 The USS Langley the first American aircraft carrier entered service in 1922 Despite being converted into an aircraft tender it was the first step in a new direction for the US Navy and naval warfare This book covers the design development and operation of USN aircraft carriers built prior to World War II including their aircraft and weaponry It also explains their various successes and losses such as the first carrier vs carrier battle at Midway the battle of the Coral Sea the battle of the Philippine Sea and the Operation Torch landings

Imperial Japanese Navy Battleships 1941-45 Mark Stille, 2012-05-20 The Imperial Japanese Navy of World War II surpassed the Allied and Axis fleets in innovation and technology This illustrated guide covers the 12 Japanese battleships that saw service between 1941 and 1945 including the mighty Yamato Each class is considered in light of its design and construction its armament and wartime modifications Mark Stille uses primary sources and dramatic photographs to tell the story of these mighty battleships at war including their major engagements during the raid at Pearl Harbor and the battle of Midway The first English language book to include photographs from the prestigious Fukui Collection this investigation will fascinate any naval enthusiast
