knowledge of the physiological and psychological challenges involved and helped us to quit our comfortable paradigms built
on steady states Furthermore measuring our reactions to intermittent stressors and determining the oscillations of our
coping mechanisms has led us to unexpected understandings This methodology has also directly improved our translational
or multidisciplinary approach to the subject Studying healthy individuals in extreme environments could improve our
understanding of patients with impaired physiological capacities who are coping with an environment that becomes extreme
to them and also improve our understanding of physiology and psychology in the elderly This eBook collects articles that
address this translational multidisciplinary approach in an integrative way As a whole this Research Topic aims to better
