Solaris system administrator's guide Janice Winsor, 1993 *A System Administrator's Guide to Sun Workstations* George Becker, Kathy Slattery, 2012-12-06 This Guide to Sun Administration is a reference manual written by Sun administrators for Sun administrators. The book is not intended to be a complete guide to UNIX Systems Administration; instead, it will concentrate on the special issues that are particular to the Sun environment. It will take you through the basic steps necessary to install and maintain a network of Sun computers. Along the way, helpful ideas will be given concerning NFS, YP, backup, and restore procedures, as well as many useful installation tips that can make a system administrator's job less painful. Specifically, SunOS 4.0 through 4.0.3 will be studied; however, many of the ideas and concepts presented are generic enough to be used on any version of SunOS. This book is not intended to be a basic introduction to SunOS. It is assumed that the reader will have at least a year of experience supporting UNIX. **Book Overview** The first chapter gives a description of the system types that will be discussed throughout the book. An understanding of all of the system types is needed to comprehend the rest of the book. Chapter 2 provides the information necessary to install a workstation. The format utility and the steps involved in the suninstall process are covered in detail. Ideas and concepts about partitioning are included in this chapter. YP is the topic of the third chapter. A specific description of each YP map and each YP command is presented along with some tips about ways to best utilize this package in your environment. **System Administrator's Guide** Prime Computer, Inc., Alice Landy, 1982 System Administrator's Guide Peter A. The System Administrator's Guide Prime Computer, Inc., 1980 **System Administrator's Guide** Dick Frost, Prime Computer, Inc., 1987 Inside Active Directory Sakari Kouti, Mika Seitsonen, 2002 *Inequality in Education: Comparative and International Perspectives* is a compilation of conceptual chapters and national case studies that includes a series of methods for measuring education inequalities. The book provides up-to-date scholarly research on global trends in the distribution of formal schooling in national populations. It also offers a strategic comparative and international education policy statement on recent shifts in education inequality and new approaches to explore, develop, and improve comparative education and policy research globally. Contributing authors examine how education as a process interacts with government finance policy to form patterns of access to education services. In addition to case perspectives from 18 countries across six geographic regions, the volume includes six conceptual chapters on topics that influence education inequality, such as gender, disability, language, and economics, and a summary chapter that presents new evidence on the pernicious consequences of inequality in the distribution of education. The book offers 1) a better and more holistic understanding of ways to measure education inequalities and 2) strategies for facing the challenge of inequality in education in the processes of policy formation, planning, and implementation at the local, regional, national, and global levels.
