Adaptive Behavior Assessment System-II Thomas Oakland, Patti L. Harrison, 2011-10-10 Adaptive Behavior Assessment System II summarizes information on adaptive behavior and skills as well as general issues in adaptive behavior assessment with the goal of promoting sound assessment practice during uses, interpretations, and applications of the Adaptive Behavior Assessment System II. Adaptive behavior and skills refer to personal qualities associated with the ability to meet one's personal needs such as communication, self-care, socialization, etc., and those of others. Data from measures of adaptive behavior have been used most commonly in assessment and intervention services for persons with mental retardation. However, the display of adaptive behaviors and skills is relevant to all persons. The Adaptive Behavior Assessment System II (ABAS II) provides a comprehensive norm-referenced assessment of the adaptive behavior and skills of individuals from birth through age 89. The comprehensive nature of the ABAS II, ease in administration and scoring, and wide age range have resulted in its widespread use for a large number of assessment purposes. The book provides practical information and thus serves as a valuable resource for those who use the ABAS II. Assists in the functional use of the ABAS II. Provides case studies illustrating use of the ABAS II in comprehensive assessment and intervention planning. Reviews scholarship on adaptive behaviors and skills. Describes legal, ethical, and other professional standards and guidelines that apply to the use of the ABAS II and other measures of adaptive behavior. Discusses the use of the ABAS II with autism, mental retardation, young children, and those in elementary and secondary school as well as incarcerated persons being evaluated for possible mental retardation.
