Virtual Music Virtual Music:

Virtual Music William Duckworth, 2005 With the explosive growth of the World Wide Web has come a new world of cyber music and with it seemingly unlimited artistic possibilities The book chronicles the development of interactive sound and music from its beginnings in the early twentieth century to cell phones and iTunes This history includes composer and musician William Duckworth's own story the creation of Cathedral one of the first interactive works of music and art on the Web From file sharing and nanotechnology to Brian Eno and Moby Duckworth examines the complex and at times controversial new musical world presently developing online Back cover *Virtual Music* David Cope, 2004-01-30 Virtual Music is about artificial creativity Focusing on the author's Experiments in Musical Intelligence computer music composing program the author and a distinguished group of experts discuss many of the issues surrounding the program including artificial intelligence music cognition and aesthetics The book is divided into four parts The first part provides a historical background to Experiments in Musical Intelligence including examples of historical antecedents followed by an overview of the program by Douglas Hofstadter The second part follows the composition of an Experiments in Musical Intelligence work from the creation of a database to the completion of a new work in the style of Mozart It includes in sophisticated lay terms relatively detailed explanations of how each step in the process contributes to the final composition The third part consists of perspectives and analyses by Jonathan Berger Daniel Dennett Bernard Greenberg Douglas R Hofstadter Steve Larson and Eleanor Selfridge Field The fourth part presents the author's responses to these commentaries as well as his thoughts on the implications of artificial creativity The book and corresponding Web site includes an appendix providing extended musical examples referred to and discussed in the book including composers such as Scarlatti Bach Mozart Beethoven Schubert Chopin Puccini Rachmaninoff Prokofiev Debussy Bartok and others It is also accompanied by a CD containing performances of the music in the text *Cybersounds* Michael D. Ayers, 2006 Textbook *Virtual Music* Shara Rambarran, 2021-04-08 Virtuality has entered our lives making anything we desire possible We are as Gorillaz once sang in an exciting age where the digital won't let us go Technology has revolutionized music especially in the 21st century where the traditional rules and conventions of music creation consumption distribution promotion and performance have been erased and substituted with unthinkable and exciting methods in which absolutely anyone can explore enjoy and participate in creating and listening to music Virtual Music explores the interactive relationship of sound music and image and its users creators musicians performers audience consumers Areas involving the historical technological and creative practices of virtual music are surveyed including its connection with creators musicians performers audience and consumers Shara Rambarran looks at the fascination and innovations surrounding virtual music and illustrates key artists such as Grace Jones The Weeknd creators such as King Tubby Kraftwerk MadVillain Danger Mouse audiovisuals in video games and performances such as Cuphead and Gorillaz audiences and consumers that contribute in making this musical experience a phenomenon Whether it is

interrogating the un realness of performers modified identities of artists technological manipulation of the Internet music industry and music production or accessible opportunities in creativity the book offers a fresh understanding of virtual music and appeals to readers who have an interest in this digital revolution **Virtual Music** William Duckworth,2013-01-11

Virtual Music How the Web Got Wired for Sound is a personal story of how one composer has created new music on the web a history of interactive music and a guide for aspiring musicians who want to harness the new creative opportunities offered by web composing Also includes a 4 page color insert *The Oxford Handbook of Music and Virtuality* Sheila

Whiteley,Shara Rambarran,2016-02-01 Has the virtual invaded the realm of the real or has the real expanded its definition to include what once was characterized as virtual With the continual evolution of digital technology this distinction grows increasingly hazy But perhaps the distinction has become obsolete perhaps it is time to pay attention to the intersections mutations and transmutations of the virtual and the real Certainly it is time to reinterpret the practice and study of music The Oxford Handbook of Music and Virtuality edited by Sheila Whiteley and Shara Rambarran is the first book to offer a kaleidoscope of interdisciplinary perspectives from scholars around the globe on the way in which virtuality mediates the dissemination acquisition performance creation and reimagining of music The Oxford Handbook of Music and Virtuality addresses eight themes that often overlap and interact with one another Questions of the role of the audience artistic agency individual and communal identity subjectivity and spatiality repeatedly arise Authors specifically explore phenomena including holographic musicians and virtual bands and the benefits and detriments surrounding the free circulation of music on the internet In addition the book investigates the way in which fans and musicians negotiate gender identities as well as the dynamics of audience participation and community building in a virtual environment The handbook rehistoricizes the virtual by tracing its progression from cartoons in the 1950s to current industry innovations and changes in practice Well grounded and wide reaching this is a book that students of any number of disciplines from Music to Cultural Studies have awaited *A Theory of Virtual Agency for Western Art Music* Robert S. Hatten,2018-09-06 In his third volume on musical

expressive meaning Robert S Hatten examines virtual agency in music from the perspectives of movement gesture embodiment topics tropes emotion narrativity and performance Distinguished from the actual agency of composers and performers whose intentional actions either create music as notated or manifest music as significant sound virtual agency is inferred from the implied actions of those sounds as they move and reveal tendencies within music stylistic contexts From our most basic attributions of sources for perceived energies in music to the highest realm of our engagement with musical subjectivity Hatten explains how virtual agents arose as distinct from actual ones how unspecified actants can take on characteristics of virtual human agents and how virtual agents assume various actorial roles Along the way Hatten demonstrates some of the musical means by which composers and performers from different historical eras have staged and projected various levels of virtual agency engaging listeners imaginatively and interactively within the expressive realms of
