Visionary Architecture From Babylon To Virtual Reality Architecture And Design:

Architecture and Science-Fiction Film David T. Fortin, 2016-12-05 The home is one of our most enduring human paradoxes and is brought to light tellingly in science fiction SF writing and film However while similarities and crossovers between architecture and SF have proliferated throughout the past century the home is often overshadowed by the spectacle of otherness The study of the familiar home within the alien SF creates a unique cultural lens through which to reflect on our current architectural condition SF has always been linked with alienation however the conditions of such alienation and hence notions of home have evidently changed There is often a perceived comprehension of the familiar that atrophies the inquisitive and interpretive processes commonly activated when confronting the unfamiliar Thus by utilizing the estranging qualities of SF to look at a concept inherently linked to its perceived opposite the home a unique critical analysis with particular relevance for contemporary architecture is made possible

earliest skyscrapers built in the city such as the 1896 American Tract Society Building to the most well known including the Woolworth Empire State and Chrysler buildings the book has become the definitive reference work on the Big Apple's skyline. Now available in a revised third edition *Manhattan Skyscrapers* presents more than a century's worth of New York's most fascinating and important buildings. Each skyscraper is presented with informative and entertaining texts by New York Times contributor Eric Nash, a striking full page photograph by architectural photographer Norman McGrath, archival images, interior views and architectural drawings. In addition to the eighty five buildings documented in previous versions of the book *Manhattan Skyscrapers* showcases eight of the most exciting new skyscrapers built in the past few years. These wonderfully diverse additions to the city: the New York Times Building by Renzo Piano, the Standard Hotel by Polshek Partnership Architects, 7 World Trade Center by SOM, the Blue Tower by Bernard Tschumi, Bank of America Tower by Cook Fox, 11 Times Square by FXFOWLE, 200 West Street by Pei Cobb Freed Partners and 425 Fifth Avenue by Michael Graves give an indication of how the city continues to evolve in the twenty first century. *Manhattan Skyscrapers* is an indispensable book for both the serious student of architecture and the casual collector of all things New York.
