Popular Electronics ,1978 **Anxiety** Allan V. Horwitz,2013-11-01 Fears phobias neuroses and anxiety disorders from ancient times to the present More people today report feeling anxious than ever before even while living in relatively safe and prosperous modern societies Almost one in five people experiences an anxiety disorder each year and more than a quarter of the population admits to an anxiety condition at some point in their lives Here Allan V Horwitz a sociologist of mental illness and mental health narrates how this condition has been experienced understood and treated through the ages from Hippocrates through Freud to today Anxiety is rooted in an ancient part of the brain and our ability to be anxious is inherited from species far more ancient than humans Anxiety is often adaptive it enables us to respond to threats But when normal fear yields to what psychiatry categorizes as anxiety disorders it becomes maladaptive As Horwitz explores the history and multiple identities of anxiety melancholia nerves neuroses phobias and so on it becomes clear that every age has had its own anxieties and that culture plays a role in shaping how anxiety is expressed **All We Have to Fear** Allan V. Horwitz, PhD,Jerome C. Wakefield,2012-06 Thirty years ago it was estimated that less than five percent of the population had an anxiety disorder Today some estimates are over fifty percent a tenfold increase Is this dramatic rise evidence of a real medical epidemic In **All We Have to Fear** Allan Horwitz and Jerome Wakefield argue that psychiatry itself has largely generated this epidemic by inflating many natural fears into psychiatric disorders leading to the over diagnosis of anxiety disorders and the over prescription of anxiety reducing drugs American psychiatry currently identifies disordered anxiety as irrational anxiety disproportionate to a real threat Horwitz and Wakefield argue to the contrary that it can be a perfectly normal part of our nature to fear things that are not at all dangerous from heights to negative judgments by others to scenes that remind us of past threats as in some forms of PTSD Indeed this book argues strongly against the tendency to call any distressing condition a mental disorder To counter this trend the authors provide an innovative and nuanced way to distinguish between anxiety conditions that are psychiatric disorders and likely require medical treatment and those that are not the latter including anxieties that seem irrational but are the natural products of evolution The authors show that many commonly diagnosed irrational fears such as a fear of snakes strangers or social evaluation have evolved over time in response to situations that posed serious risks to humans in the past but are no longer dangerous today Drawing on a wide range of disciplines including psychiatry evolutionary psychology sociology anthropology and history the book illuminates the nature of anxiety in America making a major contribution to our understanding of mental health *QST.* ,1967 The United States Catalog ,1928 **Popular Science** ,1976-01 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **The Spectator** ,1912 A weekly review of politics literature theology and art *The United States Catalog* Ida M.
