contexts such as philosophical idealism debates over the philosophical versus historical understanding of texts as well as in ideological disputations and emblematic characterisations of him by various disciplines such as law politics and international relations This volume illustrates the capacity of a text to take on the colouration of its surroundings by exploring and explicating the importance of contexts in reading and understanding how and why particular interpretations of Hobbes have emerged such as those of Carl Schmitt and Michael Oakeshott or the international jurists of the seventeenth eighteenth and nineteenth centuries
