Visualizing Human Biology:

Visualizing Human Biology Kathleen A. Ireland, 2017-12-19 Visualizing Human Biology is a visual exploration of the major concepts of biology using the human body as the context. Students are engaged in scientific exploration and critical thinking in this product specially designed for non science majors. Topics covered include an overview of human anatomy and physiology, nutrition, immunity and disease, cancer biology and genetics. The aim of Visualizing Human Biology is a greater understanding, appreciation and working knowledge of biology as well as an enhanced ability to make healthy choices and informed healthcare decisions.

Visualizing Human Biology Lab Manual Jennifer Ellie, 2011-08-24 Visualizing Human Biology Lab Manual provides 18 labs specifically designed for the non majors biology student, each of which engages students by focusing on the structure and function of each person's own unique body. The lab manual includes key experiments with step by step visual guides and more interesting real world topics to connect with students' diverse experiences. Visuals are used to teach and explain, not just illustrate, and students with varied learning styles will be engaged. The applications of common laboratory techniques in science, medicine and everyday life are also explored in each lab topic.
