Valuing Life Cass R. Sunstein, 2014-09-05 Franklin's algebra Inside government Human consequences or the real world of cost benefit analysis Dignity financial meltdown and other nonquantifiable things Valuing life 1 problems Valuing life 2 solutions The morality of risk What scares us Epilogue four ways to humanize the regulatory state Appendix A Executive Order 13563 of January 18 2011 Appendix B the social cost of carbon Appendix C estimates of benefits and costs of selected federal regulations Appendix D selected examples of breakeven analysis Appendix E values for mortality and morbidity

Valuing Life Cass R. Sunstein, 2022-12-22 Clear explanations and concrete examples of how the behavioral orientation in economics can contribute to the world of cost benefit policy formulation Choice The White House Office of Information and Regulatory Affairs OIRA is the United States regulatory overseer In *Valuing Life* New York Times bestselling author and legal scholar Cass R. Sunstein draws on his firsthand experience as the Administrator of OIRA from 2009 to 2012 to argue that we can humanize regulation and save lives in the process As OIRA Administrator he helped oversee regulation in a broad variety of areas including highway safety health care homeland security immigration energy environmental protection and education This background allows him to describe OIRA and how it works and how it can work better from an on the ground perspective Using real world examples Sunstein makes a compelling case for improving cost benefit analysis a longtime cornerstone of regulatory decision making and for taking account of variables that are hard to quantify such as dignity and personal privacy He also shows how regulatory decisions about health safety and life itself can benefit from behavioral and psychological research including new findings about what scares us and what does not By better accounting for people's fallibility he argues we can create regulation that is at once more human and more likely to achieve its goals In this highly readable synthesis of insights from law policy economics and psychology Sunstein breaks down the intricacies of the regulatory system and offers a new way of thinking about regulation that incorporates human dignity and an insistent focus on the consequences of our choices What happens when the world's leading academic expert on regulation is plunked into the real world of government *Valuing Life* describes both how Sunstein's ideas about regulation influenced his tenure in government and how his experiences in government have influenced his ideas about regulation This immensely rewarding book should be read by everyone who cares about how our government works Eric A. Posner coauthor of *Radical Markets*

Human Rights Law and Corporate Regulation Jonathan Barrett, 2024-10-24 This book argues for an intensely humanist engagement with the company and presents a model of company regulation that is compatible with the protection respect for and fulfilment of human rights Dr Barrett provides a theoretical framing for corporate regulation in the context of human rights States He argues that States which have ratified the fundamental human rights instruments should on principle exclude bodies corporate from the human rights ecosystem except to the degree necessary to respect property rights of humans and human rights in business He therefore develops a neo concession account of the corporation as the basis for a

model of corporate regulation to protect human rights The book outlines and recommends the principal features of a company under a neo concession model and the role of regulators in furthering the State s human right obligations It also delves into the potential issues of technological developments including decentralised autonomous organisations and the lessons policymakers can gain from First Nations approaches to business This is a thought provoking volume that will appeal to scholars in the disciplines of human rights law and corporate governance as well as policymakers and regulators interested in regulating business for greater societal good

Pricing Lives W. Kip Viscusi, 2018-05-15 How society s undervaluing of life puts all of us at risk and the groundbreaking economic measure that can fix it Like it or not sometimes we need to put a monetary value on people s lives In the past government agencies used the financial cost of death to monetize the mortality risks of regulatory policies but this method vastly undervalued life Pricing Lives tells the story of how the government came to adopt an altogether different approach the value of a statistical life or VSL and persuasively shows how its more widespread use could create a safer and more equitable society for everyone In the 1980s W Kip Viscusi used the method to demonstrate that the benefits of requiring businesses to label hazardous chemicals immensely outweighed the costs VSL is the risk reward trade off that people make about their health when considering risky job choices With it Viscusi calculated how much more money workers would demand to take on hazardous jobs boosting calculated benefits by an order of magnitude His current estimate of the value of a statistical life is 10 million In this book Viscusi provides a comprehensive look at all aspects of economic and policy efforts to price lives including controversial topics such as whether older people s lives are worth less and richer people s lives are worth more He explains why corporations need to abandon the misguided cost of death approach how the courts can profit from increased application of VSL in assessing liability and setting damages and how other countries consistently undervalue risks to life Pricing Lives proposes sensible economic guideposts to foster more protective policies and greater levels of safety in the United States and throughout the world
