What's the Big Idea? :- Helaine Becker,2009-10-01 **Boost Your STEAM Program with Great Literature and Activities** Liz Knowles,Martha Smith,2018-06-01 You ve created a STEAM program in your library but how do you work literacy into the curriculum With this collection of resource recommendations direction for program development and activities you ll have students reading proficiently in no time Many schools and libraries are implementing STEAM programs in the school library makerspace to promote problem solving by allowing students to create their own solutions to a problem through trial and error In order to enhance literacy development in the STEAM program however they need resources for integrating literature into the curriculum In this collection of resources for doing just that veteran education professionals and practiced coauthors Liz Knowles and Martha Smith bring readers over eight hundred recommended and annotated books and web resources selected based on research on successfully integrating STEAM and literacy programs and organized by the five STEAM areas Titles are complemented by discussion questions and problem solving activities that will aid educators in both adding and using the best literature to their STEAM programs for encouraging learning In addition to promoting literacy these resources will help to develop creativity lateral thinking skills and confidence in students **What's the Big Idea?** Helaine Becker,2009 Beginning with inventions from long long ago the needle the wheel the water pump moving to those from long ago the printing press steel the telegraph and ending with innovations from not so long ago the car the TV mp3s What s the Big Idea treats readers to an in depth but lighthearted look at 32 of our most important inventions Each invention profile lists its highlights who invented it when and where and asks and answers the question Why this invention and why now Author Helaine Becker pays close attention to what was going on in the world at the time of each invention showing the timeliness of each invention and putting it in context for the reader Fun tidbits of information are worked seamlessly and liberally into the bites of historical information to keep kids entertained and engaged Five Big Thinkers are also profiled alongside their major inventions Readers will learn about some of the oddities and follies of Archimedes Leonardo da Vinci Michael Faraday Alexander Graham Bell and Steve Jobs and Bill Gates Plus major inventions under a single theme such as the schoolroom the battlefield and the doctor s office are explored in two page illustrations Becker closes the book by asking readers What s next in the exciting world of innovation Inspired kids may very well reach for their thinking caps to find out **From Thistle Burrs to... Velcro** Josh Gregory,2012-08-01 Learn how thistle burrs inspired the invention of Velcro *Quill & Quire* ,2009 *School Library Journal* ,2010 **Famous Women Inventors: A Simple Guide to Big Ideas** Nova Martian,2025-05-16 Famous Women Inventors A Simple Guide to Big Ideas is an engaging and accessible exploration of the many groundbreaking contributions women have made to the world of invention and innovation Through a carefully structured narrative this book introduces readers to the very essence of invention the importance of studying inventors and the distinctive journeys of women who have transformed everyday life technology medicine food and

travel From Ada Lovelace the pioneer computer programmer to Marie Curie the Nobel laureate whose discoveries changed science forever the book brings their remarkable stories to life in vivid detail making the often overlooked history of women s ingenuity tangible and inspiring for all ages The volume delves into a diverse array of inventions from windshield wipers and dishwashers that revolutionized domestic life to the technological marvels underpinning the internet frequency hopping communication and life saving advances in medical care Each chapter spotlights not only historical icons but also the ongoing contributions of women in fields as varied as sustainable agriculture and eco friendly transportation The narrative is enriched with insights into the challenges these inventors faced including battles for education recognition and equal access while celebrating their resilience creativity and enduring impact on society Beyond recounting past triumphs Famous Women Inventors looks ahead to the future inspiring young readers especially girls to imagine themselves as inventors and problem solvers The book highlights current programs supporting girls in STEM showcases emerging innovators and offers practical steps for anyone interested in developing their own ideas Concluding with a call to creativity and courage it serves as both a celebration of unsung heroines and a motivational guide for the next generation of trailblazers determined to shape a better world

Money Mindset Mentors Dr. John J. Churchill,2022-09-26 Money Mindset Mentors looks at some of the most successful people in history from Aristotle to Warren Buffett and expertly maps the high achievement mindset that brings about success in both business and in life While this book sits firmly in the non fiction self help and business psychology genre its appeal is universal It has over twenty success models from business psychology and has a key to success at the end of each chapter The human brain is the most complicated machine on the planet and is capable of trillions of calculations a second but we were never given a user s manual This book in a way is the manual that you need to achieve human excellence Through the insights gained from a lifetime in clinical medicine and the world of business Churchill now brings business psychology to your fingertips from the greatest business minds on earth What makes a great person exceptional What marks them out in the history of humanity Churchill has analyzed the success principles of some of the world s most influential people including Sir Richard Branson and Abraham Lincoln Nobody is born great It is merely a self belief system that is unshakable The mentors show us how they did it and the reader can walk in the footsteps of true greatness This book will provide the reader with a rigorous apprenticeship as you absorb the hidden knowledge that comes from the years of experience of successful mentors You will learn how to forge past competitors and surpass them in brilliance This book teaches how to establish paths of excellence from within

The Last Time Traveler AQEEL AHMED,2024-03-17 The Last Time Traveler An individual in a world where time travel was banned embarks on a forbidden journey to change history Summary In the movie The Last Time Traveler there is a hero named Alex who finds a long lost time machine in a hidden room Aside from the fact that time travel is against the law in Alex s society she wants to change history for the better From the time of the dinosaurs to the Renaissance and the middle of the Industrial Revolution this is the start of an amazing

journey that will last for hundreds of years Alex faces new risks and difficulties as well as chances to grow with each time jump As Alex travels he meets a wide range of historical figures and normal people who teach him interesting things During the dinosaur age Alex learns how important it is to be careful and how powerful nature is We learned how to be brave and stand up for what s right from the scary dragons and brave knights of the Middle Ages In the Renaissance a time of invention and innovation Alex learns about the limitless potential of people s minds During the Industrial Revolution growth and compassion are shown to be very important And yet Alex s trips don t come without costs The Time Guardians are after Alex because they are in charge of making sure people don t move through time They are telling kids that messing with time can have bad results Alex gets away from capture with the help of friends he has made throughout history He learns how important it is to work together and be kind to each other Alex could have lived in the present or changed history but he decides to destroy the time machine instead and take what he has learned This movement shows that you are okay with living in the present and not trying to change the past The story The Last Time Traveler does a great job of combining themes of bravery resourcefulness peace understanding acceptance joy and how important it is to live in the present We can t change the past but we can change the future by the choices we make today as Alex s journey through time shows Making the most of every chance and living with kindness courage and joy are what the story tells us Finally Alex understands that the best way to change the world is to live by these beliefs every day and show that the moment is always the most important time

Chapter 1 Device Not Allowed Nearly no one knew about this small secret room that was in a cute little town with winding streets and clues It was hidden under an old library that was full of books with magical and exciting stories inside Alex a young and curious traveler found this cave system while looking for a kitten that was running away Few lights were on in the room A small amount of light came in through a window and cast shadows on something strange A thick layer of dust and dirt covered a strange big machine It looked old and abandoned and had a big red switch gears and buttons On the side of the device the words Time Machine could be seen though they were faint Alex had never thought she would find a time machine in real life but she had seen movies and read books about them In Alex s world going back in time was illegal and thought to be very dangerous Scholars and the government both said that time travel could be very bad because it could change important events in history or make people doubt what is happening now Because of these worries time machines were made illegal and if you use one you could get into a lot of trouble Even though there were risks Alex felt amazed and excited Alex was excited as he looked at the time machine like the main character in an adventure story who is about to start an amazing journey It was exciting to think about going back in time to see dinosaurs soldiers or maybe the future Alex thought about all the good things that might happen if he changed the past There s a chance they can stop tragedies or help people who need it There was a chance to make the world a better place Alex chose to take a chance even though he was scared and excited at the same time There was a chance to do something really cool Before going up to the machine Alex made sure no one else

was around He cleaned off the control panel and tried to figure out how it worked There were buttons and switches that said things like Past Future and specific years and times After some thought Alex took a deep breath pressed the Past button called a date and pulled the huge red lever This is it I m going to be a time traveler and change history for the better he said The machine buzzed the lights flashed and the wheels turned There was a bright light and a whoosh of air and Alex was outside the small secret space The trip through time had begun Alex was about to start an amazing journey that would be full of risks new experiences and lessons about how important it is to be brave have friends and live in the present moment Even though it is against the law in her world Alex will go on an epic journey through the ages because she is curious and wants to make things better

Chapter 2 The First Step The time machine made a loud whoosh sound like a huge breeze when Alex pressed the big red button on it In the blink of an eye everything around Alex changed in a big way The old library on top and the dusty room below were gone At the other end of the spectrum Alex found them in a huge open space with tall trees and lush green plants that went on forever Alex had never heard anything like this before It was hot and crowded outside There were dinosaurs around millions of years ago long before anyone opened a book in that old library To begin with Alex was amazed and shocked The land was filled with huge dinosaurs There were ones with long necks that ate trees ones with spikes that ate bushes and even a smaller faster group that ran through the bushes These animals were a lot bigger and brighter than Alex had thought Things looked like they were taken straight from a storybook but they were all real and living But Alex quickly learned that life in the time of the dinosaurs was not only an amazing adventure but also very dangerous These huge monsters found Alex interesting but they didn t know that he was a visitor from the future and not a part of their society They would have to be careful because some of the bigger dinosaurs might think Alex is food Alex got a chill down his spine as the loud roars kept going back and forth through the air The sounds Alex heard might have been made by bigger dinosaurs looking for food As Alex dug deeper to try to see more while staying covered they came across a scene that showed how dangerous things were at the time A big dinosaur with dangerous teeth and claws was after one of the smaller faster ones Alex saw a hunt happen right in front of her Alex understood that every moment during this time was spent trying to stay alive no matter how small Alex was used to living in safe neighborhoods and warm homes but this was a whole new world Alex found out a lot on his first trip through time Not only was it cool to see dinosaurs in real life but it was also important to know how the Earth changed over time Alex learned that there were risks and problems in every time period and that you had to be brave and smart to get through them Alex knew it was time to go back to the time machine even though it was cool to see these amazing creatures up close Alex took one last look at the dinosaurs and then pressed the Return button He was ready to learn about how different and rich life has become on Earth over time and to share memories of an amazing trip
