Whats Wrong Applied Ethicists And Their Critics:

What's Wrong? David Boonin, Graham Oddie, 2010 *What's Wrong Applied Ethicists and Their Critics* is a thorough and engaging introduction to applied ethics that covers virtually all of the issues in the field. Featuring more than ninety-five articles, it addresses standard topics such as abortion, euthanasia, capital punishment, world hunger, and animal rights, and also delves into cutting-edge areas like cloning, racial profiling, same-sex marriage, prostitution, and slave reparations. The volume includes seminal essays by prominent philosophers Robert Nozick, James Rachels, Peter Singer, and Judith Jarvis Thomson, alongside work by newer voices in the field. Employing a unique approach to teaching argumentation, editors David Boonin and Graham Oddie unify the wealth of material presented in this collection. Each chapter opens with a featured article that takes a strong stand on a particular issue; the essays that immediately follow offer objections and critical responses to the arguments put forth in the featured selection. This format helps students learn how to better engage in debates because it illustrates how philosophers argue with each other. In addition, a general introduction describes strategies for understanding and evaluating the different types of arguments contained in the readings, while detailed chapter introductions enable students to see precisely how the arguments presented in the various writings are related to one another. Discussion questions and suggestions for further reading are included for each chapter. Ideal for courses in introduction to ethics and applied ethics, contemporary moral problems, *What's Wrong* can also be used in critical thinking courses that emphasize philosophical argumentation.

Insights into Ethical Theory and Practice Francis Fallon, 2022-02-06 Ethical issues hold great importance for all of us, but expert accounts of them are difficult to access for those outside academics. This volume bridges that gap by framing a variety of essays within the field in a way that renders them accessible to experts and non-experts alike. Many collections on ethics re-publish classic essays and offer contextualization and analysis, while other volumes of emerging innovative work presuppose a background in the field. This book uniquely borrows from both approaches, offering emerging innovative work carefully curating its order for sense and presenting the work so that non-experts may understand it. The field of ethics is an eclectic one. Where other collections on ethics may intimidate the reader by representing the field as an organized monolith or as impenetrable to outsiders, this volume is designed to give readers confidence and enthusiasm in approaching a diverse and lively subject.

Applied Ethics Elizabeth Jackson, Tyron Goldschmidt, Dustin Crummett, Rebecca Chan, 2021-11-03 *Applied Ethics: An Impartial Introduction* prepares readers to evaluate selected classical and contemporary problems in applied ethics in a way that does justice to their complexity without sacrificing clarity or fairness of representation. Its balanced exposition and analysis, enhanced by helpful pedagogical features, make it an ideal book for introducing the ethics of real-life problems, including abortion, animal rights, disability, the environment, poverty, and punishment.

The Non-Identity Problem and the Ethics of Future People David Boonin, 2014-10-16 David Boonin presents a new account of the non-identity problem, a puzzle about our obligations to people

who do not yet exist Our actions sometimes have an effect not only on the quality of life that people will enjoy in the future but on which particular people will exist in the future to enjoy it In cases where this is so the combination of certain assumptions that most people seem to accept can yield conclusions that most people seem to reject The non identity problem has important implications both for ethical theory and for a number of topics in applied ethics including controversial issues in bioethics environmental ethics and disability ethics It has been the subject of a great deal of discussion for nearly four decades but this is the first book length study devoted exclusively to its examination Boonin begins by explaining what the problem is why the problem matters and what criteria a solution to the problem must satisfy in order to count as a successful one He then provides a critical survey of the solutions to the problem that have thus far been proposed in the sizeable literature that the problem has generated and concludes by developing and defending an unorthodox alternative solution one that differs fundamentally from virtually every other available approach

A Moral Defense of

Recreational Drug Use Rob Lovering,2015-08-12 Why does American law allow the recreational use of some drugs such as alcohol tobacco and caffeine but not others such as marijuana cocaine and heroin The answer lies not simply in the harm the use of these drugs might cause but in the perceived morality or lack thereof of their recreational use Despite strong rhetoric from moral critics of recreational drug use however it is surprisingly difficult to discern the reasons they have for deeming the recreational use of some drugs morally wrong In this book Rob Lovering lays out and dissects various arguments for the

immorality of using marijuana cocaine heroin and other drugs recreationally He contends that by and large these arguments do not succeed Lovering's book represents one of the first works to systematically present analyze and critique arguments for the moral wrongness of recreational drug use Given this as well as the popularity of the morality based defense of the United States drug laws this book is an important and timely contribution to the debate on the recreational use of drugs

The Oxford Handbook of Philosophy of Education Harvey Siegel, 2009-10-30 Philosophy of education has an honored place in the history of Western philosophical thought Its questions are as vital now both philosophically and practically as they have ever been In recent decades however philosophical thinking about education has largely fallen off the philosophical radar screen Philosophy of education has lost intimate contact with the parent discipline to a regrettably large extent to the detriment of both The Oxford Handbook of Philosophy of Education is intended to serve as a general introduction to key issues in the field to further the philosophical pursuit of those issues and to bring philosophy of education back into closer contact with general philosophy Distinguished philosophers and philosophers of education most of whom have made important contributions to core areas of philosophy turn their attention in these 28 essays to a broad range of philosophical questions concerning education The chapters are accessible to readers with no prior exposure to philosophy of education and provide both surveys of the general domain they address and advance the discussion in those domains in original and fruitful ways Together their authors constitute a new wave of general philosophers taking up fundamental philosophical questions about education the first such cohort of outstanding general philosophers to do so in English in a generation

The Ethics of Canine Care Craig Banks Merow, 2023-06-14 The social status of dogs has changed dramatically in the past 75 years Today most dog owners and small animal veterinarians consider companion canines to be members of their families and communities However the attitudes of some dog owners concerning their responsibilities to their dogs and many of the laws that regulate dog ownership and veterinary medical practice largely reflect the human canine relationship and ethical norms of an earlier era This incongruity leads to unmet needs for companion canines and high levels of stress for many veterinary clinicians This book presents arguments for human responsibilities to companion canines a detailed analysis of what those responsibilities entail and the professional ethical standards and laws needed to ensure that responsibilities are met A new moral framework the Custodial Property Framework is created for the care and medical treatment of companion canines and is grounded in a detailed analysis of the responsibilities of care generated by the relationship we have with our best friends

The Ethics of the Family Linda Oravec, Adam Potthast, Stephen Scales, 2010-03-08 Our families are our first and most important ethical training grounds But what is the family And what are our ethical commitments to our family members and to the broader moral community After a brief introductory chapter on basic ethical concepts and theories the essays in this volume provide readers with ethical analyses of issues ranging from same sex marriage to a controversial proposal to license parents The chapters cover love sex marriage parents and children the relationship between the family and the larger moral

community and the influence of emerging technologies on the ethical issues inherent in family life The volume is intended to open up this exciting territory in applied ethics to those interested in philosophy family studies social work and to anyone who wants a deeper understanding of the ethical forces at work in this most basic social institution
