Korten, 2006-05-14 The international bestselling author shares a compelling devastating and ultimately profoundly hopeful guide to navigating our global future Van Jones Executive Director The Ella Baker Center for Human Rights David Korten argues that corporate consolidation of power is merely a contemporary manifestation of what he calls Empire the organization of society by hierarchies of domination Increasingly destructive on every level the way of Empire is leading to environmental and social collapse We now face a mounting perfect storm of climate change peak oil and the financial

instability inherent in an unbalanced global trading system In *The Great Turning* Korten makes the case that we must change course and choose a new future as a conscious collective act We cannot avoid the unraveling We can however turn a potentially terminal crisis into an epic opportunity to bring forth a new era of Earth Community grounded in the life affirming values of ecological integrity economic justice community and democracy *The Great Turning* is an essential resource for those who understand this need and are prepared to engage what Thomas Berry calls the Great Work

David Campbell, 2012-07-23 The authors argue for constitutional reform which would facilitate British citizens effective participation in the making of the decisions that set the basic pattern of their collective life They assert that this failure of the British Constitution is unacceptable

The Governance of Corporate Groups Janet Dine, 2000-06-05 Starting from a discussion of the theoretical underpinning of the place companies occupy in society this book explores the consequences of adherence to free market contractualist theory including the lack of regulatory control of a sufficiently robust nature Professor Dine comments on the absence of a concept of governance of groups from a comparative perspective and considers the consequences of this absence for the conflict of laws In particular she highlights the tragic consequences of globalization by transnationals including polarization of income and environmental damage and suggests a possible legal framework to prevent future damages

Growth Growth Growth Julian Cobbing, 2024-04-11 *Growth Growth Growth* retells history as a succession of pivotal crises linked to economic growth Beginning with agriculture ten thousand years ago each crisis led to an impasse until human ingenuity devised a technical solution to fix it These solutions included the alphabet paper clocks guns the printing press the steam engine the petrol engine electricity nitrogen fertilizer and the computer Each solution however played a part in the next crisis Growth driven

crises led to the world wars of the first half of the twentieth century including the atrocities of Stalin Hitler and Hiroshima The brief golden age of capitalism of the 1950s and 1960s gave way to the ultra corporate capitalism that in one variant or another is now the global economic system Julian Cobbing s lively account exposes the historical roots of our converging problems the destruction of the environment the massacre of other species the running down of oil reserves global heating and the nuclear threat to all of us This time there is no technical solution since we are devouring the Earth s finite resources Cobbing reminds us that we are just one species in a planetary life system which could dispense with us if we are not needed

Companies, International Trade and Human Rights Janet Dine, 2005-02-24 Originally published in 2005 this book focuses on the role of corporations within the trading system and the complex relationships between corporations nation states and international organisations The actions and motives that drive corporations are considered as well as the structure of the international trading system Remedial devices such as Codes of Conduct and Human Rights instruments are assessed for effectiveness The book seeks reasons for what is a growing understanding that international trading regimes are not meeting objectives found in many international agreements including both the international trade agreements themselves WTO GATT TRIPS etc and human rights instruments In particular it is clear that the prevalence and severity of poverty is not being adequately addressed This work sets out to investigate the role played by companies in this failure in the globalisation of trade to realise its aims in particular the failure to achieve the minimum of basic rights the right to food
