Wild Flowers An Aid to Knowledge of our Wild Flowers and their Insect Visitors 1901 is a book written by nature writer
 Neltje Blanchan and published by Doubleday Page Company In order to aid the amateur botanist it used color to classify
 flowers noting that this made it easier for novices to identify specimens and that insects also used color to identify plants The
 book also explored the relationship between flowers and the insects that feed on their nectar using rather anthropomorphic
 language and discussed scientific questions of the time such as Sprengel's theory that orchids produce no nectar Her
 description of the flowers also referred to relevant poetry and folklore Unlike her book *Bird Neighbors* the photographs by
 Henry Troth and A R Dugmore were taken directly from nature The New York Times wrote that this kind of a popular flower
