Design for a Vulnerable Planet Frederick Steiner, 2011-05-16 We inhabit a vulnerable planet The devastation caused by natural disasters such as the southern Asian tsunami Hurricanes Katrina and Ike and the earthquakes in China's Sichuan province Haiti and Chile as well as the ongoing depletion and degradation of the world's natural resources caused by a burgeoning human population have made it clear that business as usual is no longer sustainable We need to find ways to improve how we live on this planet while minimizing our impact on it Design for a Vulnerable Planet sounds a call for designers and planners to go beyond traditional concepts of sustainability toward innovative new design that fosters regeneration and resilience Drawing on his own and others experiences across three continents Frederick Steiner advocates design practice grounded in ecology and democracy and informed by critical regionalism and reflection He begins by establishing the foundation for a more ecological approach to planning and design adopting a broad view of ecology as encompassing human and natural urban and wild environments Steiner explores precedents for human ecological design provided by architect Paul Cret landscape architect Ian McHarg and developer George Mitchell while discussing their planning for the University of Texas campus the Lake Austin watershed and The Woodlands Steiner then focuses on emerging Texas urbanism and extends his discussion to broader considerations beyond the Lone Star State including regionalism urbanism and landscape in China and Italy He also examines the lessons to be learned from human and natural disasters such as 9 11 Hurricane Katrina and the BP oil spill Finally Steiner offers a blueprint for designing with nature to help heal the planet's vulnerabilities Words on Cassette, 2002 R R Bowker Publishing, 2002 *Books Out Loud* ,2007

New Vernacular Architecture Vicky Richardson, 2001 New Vernacular Architecture considers the synthesis of modernity and tradition in contemporary architecture Focusing on 37 international examples of buildings of different types completed in the last decade it examines architecture that reinterprets rather than revives traditional forms materials and construction techniques The projects covered range from better known works by renowned architects such as Michael Graves Renzo Piano and David Chipperfield to less familiar buildings in Hungary Nepal Latvia and elsewhere The fragmentation of nation states and the greater plurality of political and cultural identities that have occurred over recent years have led to a growing reaction in architecture against global blanding the worldwide homogenization of images and designs As a result local context materials and culture are becoming increasingly important concerns for many architects Architecture has captured the public imagination as a means of lending form to evolving regional identity and as a way of reflecting difference Each project features a thoroughly researched and detailed commentary and is generously illustrated with photographs sketches and plans BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Architecture* ,1999 **Harvard Design Magazine** ,2004 *Urban Land* ,2006-07 **The Routledge Companion to Smart Design Thinking in Architecture & Urbanism for a Sustainable, Living Planet** Mitra

Webb,2012-11-30 Despite calls for electronic virtual digital libraries without walls the walled variety are still being built some of them massive This book explores the reasons for this contradiction by examining several notable new library facilities around the world to see how modern expectations for libraries are being translated into concrete and steel More and more libraries are looking at change not as a dreaded hazard but as an opportunity that can itself be seized to strengthen the library in the areas of mission

technologies facilities funding and organizational structure Thirteen libraries are discussed by a librarian or administrator who worked on the project Each author writes about the design and building concerns that were particularly relevant to that library philosophy political issues or any other concerns that affected planning building and services in the new facility

Introductory and concluding chapters identify underlying values and themes tying everything together The unique combinations of issues constraints and opportunities show how libraries are planning to fit into the approaching era of virtual information delivery
